NEW BUSINESS:

Insurance Recommendations from NYMIR:

The emergency exit door at the Hwy Garage should be repaired or replaced to ensure rapid egress from the building in the event of an emergency.

The access to the electrical panels in the Highway Garage was obstructed. A minimum of 36 inches of clear access must be maintained in front of electrical panels at all times.

Materials were being stored in front of the fire extinguisher on the south wall of the building, blocking access to the extinguisher. These materials should be removed and the area in front of fire extinguishers should remain clear so they can be readily accessed in event of an emergency.

Parks:

The resilient surface beneath the playground equipment needs to be uncompressed and redistributed uniformly or supplementary material added. Specifically, additional material is needed under the swing set and around the spring rockers as their anchors were exposed and need to be covered.

The swing chains are worn and should be replaced. In addition, a program for chain replacement should be implemented.

MEETING OPEN TO THE PUBLIC:

No Comments.

MEETING CLOSED TO THE PUBLIC.
