*Per Code/Zoning Officer, landlocked parcels are not buildable and current zoning requires a lot to have at least 220 feet of road frontage and be 1.5 acres.

He reported that some parcels are pre-existing and non-conforming but some lots can be built on as long as the setbacks can be met and the well can be separated from the septic system and really on a case by case basis.

Highlighted items reflect changes from DANC provided list

Acres and road frontage information only presented for parcels without a structure (in order to determine compliance with the current zoning information)
