

Note: The following is the output of transcribing from an audio/video recording from Zoom. Although the transcription is fairly accurate, in some cases it is incomplete or inaccurate due to inaudible passages or transcription errors, and in some cases, words spoken by one participant may be inaccurately attributed to another. It is posted as an aid to understanding the proceedings at the meeting, but should not be treated as an authoritative record.

1

00:00:04.110 --> 00:00:05.520

Town of Parish 1: Okay. The recording is running.

2

00:00:15.330 --> 00:00:17.070

Town of Parish 1: The United States of America.

3

00:00:20.130 --> 00:00:20.760

Town of Parish 1: On a

4

00:00:22.740 --> 00:00:23.220

Town of Parish 1: Long

5

00:00:33.840 --> 00:00:34.320

Hair

6

00:00:38.220 --> 00:00:38.910

Town of Parish 1: Council would

7

00:00:45.930 --> 00:00:48.120

Like to introduce our presenters tonight.

8

00:00:57.480 --> 00:00:59.100

Town of Parish 1: Okay. Very times when

9

00:01:00.240 --> 00:01:07.980

The notification is the project manager for our social engineers and architects managed to reverse

10

00:01:09.420 --> 00:01:15.210

Engineer like altering our principles little image over or senior

11

00:01:17.130 --> 00:01:22.140

Town of Parish 1: Market data on on the municipal water district number one.

12

00:01:22.320 --> 00:01:23.340

Town of Parish 1: Was to jail or so.

13

00:01:25.740 --> 00:01:26.340

Town of Parish 1: Tonight, so

14

00:01:27.870 --> 00:01:48.240

Town of Parish 1: This is your time, this time that review the community gives you the answers that clarification for whatever reason you need to make populate your mind. What do you want to their water district number one rock the boat, what we normally know last 60 days no more than 75 days.

15

00:01:50.790 --> 00:02:00.960

Town of Parish 1: That's what we have to adapt the resolution to increase down for the definition of evil I are going to contain you get out

16

00:02:02.190 --> 00:02:02.910

Town of Parish 1: Of stock.

17

00:02:04.230 --> 00:02:19.530

Town of Parish 1: So we'll make that decision systems me. But again, ask your question. It's just clarification. So here you can always tell me they look the mind regarding any any water district number one.

18

00:02:20.550 --> 00:02:21.570

Town of Parish 1: Influence there.

19

00:02:22.710 --> 00:02:23.520

Town of Parish 1: So I'll

20

00:02:25.380 --> 00:02:29.490

Town of Parish 1: Follow curious. Two questions I would ask that we asked one question.

21

00:02:36.360 --> 00:02:38.280

Town of Parish 1: One question at a time and recognizing

22

00:02:39.810 --> 00:02:40.680

Town of Parish 1: Around around

23

00:02:43.980 --> 00:02:44.940

Town of Parish 1: Also, a lot of people that are

24

00:02:46.830 --> 00:02:47.280

Town of Parish 1: Two.

25

00:02:48.720 --> 00:02:51.480

Town of Parish 1: questions in chat zones.

26

00:02:54.120 --> 00:02:54.810

Recognition.

27

00:02:56.130 --> 00:03:00.030

Town of Parish 1: Portions of our business. So anybody in this room right now.

28

00:03:05.970 --> 00:03:06.420

Town of Parish 1: You're

29

00:03:16.830 --> 00:03:17.310

You're

30

00:03:34.890 --> 00:03:35.220

Right.

31

00:03:43.470 --> 00:03:43.950

Town of Parish 1: Yeah.

32

00:03:46.440 --> 00:03:46.920

So,

33

00:03:53.310 --> 00:03:58.470

Town of Parish 1: You want to test it out. Carry on. So maybe someone can get some feedback.

34

00:04:06.840 --> 00:04:09.660

Town of Parish 1: Sure, good evening everyone all

35

00:04:11.070 --> 00:04:12.270

Town of Parish 1: We got sounds good.

36

00:04:13.620 --> 00:04:14.400

Town of Parish 1: Are you aiming

37

00:04:15.420 --> 00:04:22.440

Town of Parish 1: To know, okay, we are going to talk about the history of this project.

38

00:04:23.880 --> 00:04:24.660

Town of Parish 1: Goes through some

39

00:04:25.920 --> 00:04:28.800

Town of Parish 1: Recent bindings and talks about the next steps.

40

00:04:31.080 --> 00:04:33.900

Town of Parish 1: First first slide in history.

41

00:04:39.600 --> 00:04:45.540

Town of Parish 1: So the district was born in November 2018

42

00:04:47.070 --> 00:04:57.150

Town of Parish 1: Bond resolutions completed for this project that tiny little project class with 9.2 million that was completed in February 14 20

43

00:04:58.530 --> 00:05:03.300

Town of Parish 1: Some other basic information about those projects at that time there was

44

00:05:04.530 --> 00:05:06.870

Town of Parish 1: The total equivalent he

45

00:05:07.200 --> 00:05:12.000

Town of Parish 1: Was 449 was based on the status completed at that time.

46

00:05:13.050 --> 00:05:23.550

Town of Parish 1: On the single family just explained with us. It's Stanford equivalent rolling unit and 111 dwelling unit is

47

00:05:24.570 --> 00:05:33.210

Town of Parish 1: Equivalent to a single family house. The one single family house one for one year as part of that.

48

00:05:34.350 --> 00:05:34.920

Town of Parish 1: Anyway, and

49

00:05:37.410 --> 00:05:38.010

Town of Parish 1: Then

50

00:05:40.470 --> 00:05:48.060

Town of Parish 1: At that time, the anticipated birth year nuclear cost per single family residence one edu \$639

51

00:05:49.770 --> 00:05:53.370

Town of Parish 1: And sophisticated funding sources that I'm

52

00:05:56.340 --> 00:05:57.210

They looked at

53

00:05:58.650 --> 00:06:11.700

Town of Parish 1: receiving funding actually greens from the water infrastructure improvements program and was proposed to being one grant for the village and one grand for the town.

54

00:06:13.020 --> 00:06:17.100

Town of Parish 1: So that program is about two grants for this project.

55

00:06:19.470 --> 00:06:21.690

Town of Parish 1: They get better time the brakes were to

56

00:06:27.780 --> 00:06:35.850

Town of Parish 1: Move on to. So I mentioned the district formation. The next slide shows the district boundaries.

57

00:06:38.880 --> 00:06:39.450

Town of Parish 1: Point on

58

00:06:41.040 --> 00:06:41.970

Town of Parish 1: steamer.

59

00:06:44.670 --> 00:06:46.980

Town of Parish 1: On this area that was an action points.

60

00:06:48.900 --> 00:06:51.300

Town of Parish 1: W industry references up in the top

61

00:06:52.410 --> 00:06:53.760

Town of Parish 1: Right corner of the district.

62

00:07:03.150 --> 00:07:05.520

Town of Parish 1: Now, somebody's talking in the background.

63

00:07:08.790 --> 00:07:09.510

Town of Parish 1: So that's the

64

00:07:13.350 --> 00:07:13.890

Town of Parish 1: Scene.

65

00:07:18.000 --> 00:07:24.120

Town of Parish 1: Moving on to the next slide development since 2018

66

00:07:27.600 --> 00:07:28.230

Town of Parish 1: Since we've

67

00:07:29.550 --> 00:07:30.210

Town of Parish 1: Been involved.

68

00:07:31.350 --> 00:07:37.380

Town of Parish 1: In the budget and update order. We've also looked at the news articles which will go

69

00:07:39.750 --> 00:07:44.160

Town of Parish 1: And also review the potential funding sources for the project.

70

00:07:51.060 --> 00:07:56.070

Town of Parish 1: Throat and Michael cheery some of the product information.

71

00:07:57.210 --> 00:08:00.480

Town of Parish 1: On the next one.

72

00:08:06.180 --> 00:08:07.980

Town of Parish 1: Thanks greater. Can everyone hear me.

73

00:08:09.930 --> 00:08:10.650

Town of Parish 1: All right, good.

74

00:08:12.240 --> 00:08:20.910

Town of Parish 1: Yes, we'll go through some of the updating product information, the greater some right and the last slide. First is the total project off the project.

75

00:08:22.050 --> 00:08:34.320

Town of Parish 1: So what we did the budget of the project. We looked at least started as we never seen the product form we veered into

76

00:08:35.490 --> 00:08:45.120

Town of Parish 1: Project. So similar scope and size that we see in the area. We also have a bunch of figures check here you in this case by the antibiotics.

77

00:08:48.090 --> 00:08:49.320

Town of Parish 1: Figures or cross check that.

78

00:08:50.490 --> 00:09:00.540

Town of Parish 1: Gregor rooted in the next door to the lioness Ed us. So Ed using brief based upon guys provided by the food.

79

00:09:02.010 --> 00:09:23.880

Town of Parish 1: And this ties into the next ball ago we use USDA guidelines to develop the number of reviews and the system and we summarize things here. Typical single family house will be one for drawing a to ban house will be too low and wrong unit three class of course will be three.

80

00:09:25.560 --> 00:09:32.670

Town of Parish 1: Apartments would be wanting to you and commercial properties will be assigned based on otherwise.

81

00:09:35.310 --> 00:09:53.220

Town of Parish 1: And hello on to the next ball was was another major update we looked at this with a clean slate. We surveyed awning available out there and what we came up with is the most probable cloning scenarios were with USDA Rural Development, there are federal funding source of

82

00:09:54.240 --> 00:10:02.790

Town of Parish 1: Funds wine and sewer justice projects. And we also looked at assistant role and what was previously.

83

00:10:03.810 --> 00:10:10.290

Town of Parish 1: Looked at with the we have brother in law program. This is the year state in the US.

84

00:10:11.640 --> 00:10:24.600

Town of Parish 1: Which funds products between multiple municipality capability and Pat and enjoy product comparison and for some sources. There's numerous other sources of grand loan and we explored and

85

00:10:25.410 --> 00:10:40.770

Town of Parish 1: Based on those funding sources and what they offer terms of brand and alone minute we developed an answer. It dissipated or series of pot, which includes plastic instruments and lots of operating system.

86

00:10:42.450 --> 00:10:44.100

Town of Parish 1: Approximately \$99

87

00:10:45.540 --> 00:10:47.130

Town of Parish 1: Or \$76 from

88

00:10:49.260 --> 00:11:02.700

Town of Parish 1: The game here or guide for our future classes, we have to say the New York State lowers average for a while, which that figures currently sitting in mind.

89

00:11:05.460 --> 00:11:06.480

Town of Parish 1: Just under them.

90

00:11:08.520 --> 00:11:09.930

Town of Parish 1: The next slide.

91

00:11:12.240 --> 00:11:13.320

Town of Parish 1: So next steps will be

92

00:11:15.420 --> 00:11:26.010

Town of Parish 1: Providing goes looted to this air marks alone, we have a very nice and wide as the bumpy, how are

93

00:11:28.080 --> 00:11:28.500

Town of Parish 1: You here.

94

00:11:29.910 --> 00:11:46.350

Town of Parish 1: If the increase that increase that only 50% of the voters loan failure for the menu, the top and work to get funding and been meaning to the project of the volume lower if that money disappeared into the funding is not secure

95

00:11:51.990 --> 00:11:58.380

Town of Parish 1: And stay with our bond women and meet that goal anticipated verse here.

96

00:12:00.990 --> 00:12:06.720

Town of Parish 1: Is product gained 50% less about the borders and favorite other

97

00:12:07.800 --> 00:12:09.420

Town of Parish 1: voted down the product.

98

00:12:11.070 --> 00:12:16.590

Town of Parish 1: The next steps that case will be a fisherman, for me, Sam, what's

99

00:12:17.760 --> 00:12:21.540

Town of Parish 1: This one stand as it is and it's

100

00:12:22.620 --> 00:12:24.990

Town of Parish 1: Made on alternative plan for

101

00:12:26.040 --> 00:12:26.760

Town of Parish 1: Another

102

00:12:27.780 --> 00:12:29.400

Town of Parish 1: Through or suggest

103

00:12:34.290 --> 00:12:38.820

Town of Parish 1: Any question any of those event information going to go through

104

00:12:41.970 --> 00:12:54.720

Town of Parish 1: Any questions as we go over here. That's our presentation. We wanted to kind of summarize what the product actually look like in 2018 was updated version eight

105

00:13:15.390 --> 00:13:17.340

Town of Parish 1: Thanks guys like total

106

00:13:19.260 --> 00:13:22.530

Town of Parish 1: Premium formation. Some of the stuff that I didn't ask you

107

00:13:24.810 --> 00:13:26.820

Town of Parish 1: A lot different now than it was in 2018

108

00:13:28.020 --> 00:13:32.910

Town of Parish 1: To bond by project that we put together then or support them.

109

00:13:34.170 --> 00:13:48.360

Town of Parish 1: Now, the process is a lot higher coders. Definitely not being stuck with that. Who knows what's going on in Greece are mainly because of inflation on material costs more.

110

00:13:50.550 --> 00:13:54.630

Town of Parish 1: Going on. So the costume basement.

111

00:13:55.770 --> 00:14:02.310

Town of Parish 1: Now just because we wanted to do it didn't watch the two leaders.

112

00:14:05.010 --> 00:14:10.530

Town of Parish 1: So now I'm going with one year and and possibly a USDA grant

113

00:14:12.510 --> 00:14:17.400

Town of Parish 1: Problem and we may only get more and more elusive with those tools that we

114

00:14:18.990 --> 00:14:24.690

Town of Parish 1: Were asked to put in place once you give us permission to do that. You want us to move on.

115

00:14:25.080 --> 00:14:37.980

Town of Parish 1: We're not just looking for those two guys will be looking for as early as possible which will lower you are each brand that we get in and be much of something better than nothing. So the maps, you're looking at right now. The name is Max.

116

00:14:39.630 --> 00:14:49.680

Town of Parish 1: If we give more around the national man you led us are just one question race today and they can download the one

117

00:14:50.910 --> 00:14:51.990

Town of Parish 1: So,

118

00:14:54.870 --> 00:14:55.500

Town of Parish 1: Question.

119

00:14:56.670 --> 00:14:57.060

Town of Parish 1: One.

120

00:15:00.330 --> 00:15:06.330

Town of Parish 1: Will be wondering why we're doing this process where you will

121

00:15:07.590 --> 00:15:11.400

Town of Parish 1: Go first, but I got any questions people have

122

00:15:12.900 --> 00:15:14.700

Town of Parish 1: That all

123

00:15:16.050 --> 00:15:16.410

Town of Parish 1: Grant.

124

00:15:18.180 --> 00:15:21.540

Town of Parish 1: We actually require pull into stuff.

125

00:15:23.670 --> 00:15:31.350

Town of Parish 1: That is what I meant at the time, whereas Google bought evolution and I want to do.

126

00:15:32.640 --> 00:15:37.740

Town of Parish 1: Another project that would be more more Andre

127

00:15:39.540 --> 00:15:44.730

Town of Parish 1: So they have to actually do this work and they have have that on

128

00:15:46.500 --> 00:15:52.890

Town of Parish 1: An app for the 90 to submit those applications. So that way, it's important to

129

00:15:54.090 --> 00:15:54.390

Town of Parish 1: People

130

00:15:55.890 --> 00:16:01.770

Town of Parish 1: Like, per se, you know, in the break room and they don't proceed, but we do

131

00:16:03.330 --> 00:16:03.960

Town of Parish 1: Transfer

132

00:16:04.980 --> 00:16:05.370

Town of Parish 1: Back.

133

00:16:07.440 --> 00:16:08.700

Town of Parish 1: And there are people like

134

00:16:13.200 --> 00:16:14.340

Town of Parish 1: 40% ladies in

135

00:16:19.920 --> 00:16:20.310

Town of Parish 1: Your

136

00:16:24.570 --> 00:16:25.110

Life.

137

00:16:28.800 --> 00:16:29.580

Town of Parish 1: Exactly.

138

00:16:50.640 --> 00:16:51.210

That make

139

00:16:55.950 --> 00:16:57.690

Town of Parish 1: US tax wise.

140

00:17:05.820 --> 00:17:07.920

Town of Parish 1: Still view it.

141

00:17:14.580 --> 00:17:17.220

Town of Parish 1: Yes, very first one again please.

142

00:17:33.180 --> 00:17:34.140
You

143

00:17:35.400 --> 00:17:39.510
Town of Parish 1: So when I'm in certain places right now.

144

00:17:41.130 --> 00:17:42.660
Town of Parish 1: To our lives.

145

00:17:46.230 --> 00:17:46.650
Town of Parish 1: Or

146

00:17:56.010 --> 00:18:01.290
Town of Parish 1: If I could interrupt you. Could you speak from the mic. I'm getting comments in chat that people can hear.

147

00:18:07.320 --> 00:18:07.980
Town of Parish 1: That matter.

148

00:18:09.300 --> 00:18:17.520
Town of Parish 1: So, so the, what happens is once the project moves, for we cannot have conversations with the town board about this.

149

00:18:18.720 --> 00:18:27.090
Town of Parish 1: They would actually once it is though that hand in the bowl is positive, the folks in the district want to move forward with the project.

150

00:18:27.450 --> 00:18:36.150
Town of Parish 1: Then when the town board will do is update your borrowers and you shouldn't increase by the pound. And then they will take out and qualifying to

151

00:18:36.990 --> 00:18:49.470
Town of Parish 1: Before fun and they will actually reimburse the boring and they already have done through who are going to cover these so far and maybe keep that boring.

152

00:18:50.100 --> 00:18:57.570
Town of Parish 1: And actually the funding agencies that we're planning for funny, where they actually offer a what they call construction.

153

00:18:57.960 --> 00:19:06.900

Town of Parish 1: They actually be defining the project. While it's going through construction work. That means for the people on the district is fate would have to make any sense.

154

00:19:07.380 --> 00:19:21.660

Town of Parish 1: So from that time to jump in here to them, get into the legal stuff here. But, you know, to get to get to your database for for money they make the first payment. So when they take out that money they do that.

155

00:19:22.710 --> 00:19:41.460

Town of Parish 1: Then they allow their time to get the construction project. So short answer to your question is the way to be done right now. How you guys had to pay that that goes away and then the project is completed with the financing that's in place and then you start paying your

156

00:19:42.480 --> 00:19:48.810

Town of Parish 1: dollar fee or whatever the cost for us in terms of the full cost like your lateral

157

00:20:27.510 --> 00:20:27.840

And

158

00:20:41.010 --> 00:20:41.580

Town of Parish 1: Now,

159

00:20:43.980 --> 00:21:00.690

Town of Parish 1: It for those pieces were paid for land on this page here to your taxes, those that want us to feel the one that 20,000 spread out to everybody and they made X amount to pay it on that's done it's repaid to the gentleman, which we got a lot

160

00:21:01.740 --> 00:21:01.980

Town of Parish 1: To do.

161

00:21:03.390 --> 00:21:16.800

Town of Parish 1: The water just went down that down on that day. You did that so that when I was taking care of everything for free now with the new and yes we are debt for me or

162

00:21:18.660 --> 00:21:19.950

Town of Parish 1: Anybody anywhere to do

163

00:21:21.120 --> 00:21:34.920

Town of Parish 1: surveys and studies that have to be done to date before they qualify for those other grants that was one of the issues, last time we had some done. We didn't have all this time and made sure that we got everything in place before

164

00:21:36.060 --> 00:21:54.090

Town of Parish 1: Providing the orders, give us permission to do if the voltage want this to go longer in the boards as they're willing to borrow 16,600,000 then we move forward. And so curious to borrow money off the worst fear, rather than at this point.

165

00:21:55.230 --> 00:21:57.060

Town of Parish 1: Three right will

166

00:22:03.270 --> 00:22:05.700

Already be more

167

00:22:07.200 --> 00:22:07.500

So,

168

00:22:13.380 --> 00:22:27.660

Town of Parish 1: This gets voted down. Yes, you're going to have to repay gentlemen one the downloads that we've spent to get all these studies and surveys done in caught up to date. So never met down on this and I can play on the template. It's about

169

00:22:29.850 --> 00:22:33.060

Town of Parish 1: 35 balls and supplier name and your

170

00:22:36.300 --> 00:22:40.620

Town of Parish 1: Excuse mesir, I appreciate your kind of yourself to be recognized to speak.

171

00:22:44.040 --> 00:22:45.660

Town of Parish 1: By the ethical questions.

172

00:22:53.430 --> 00:22:54.990

Town of Parish 1: Anyone one question.

173

00:22:58.740 --> 00:23:08.130

Town of Parish 1: Well, I prefer question jaan morning I didn't ask you. This is a public hearing. I asked questions.

174

00:23:10.350 --> 00:23:11.490
Town of Parish 1: According to

175

00:23:15.300 --> 00:23:22.380
Town of Parish 1: The both ways. One is that a public statement to the wall at a, at a

176

00:23:23.940 --> 00:23:33.840
Town of Parish 1: Company, you're okay with this point, we're asking the questions posted for years. Like, like in your mind. I prefer question at this point.

177

00:23:36.510 --> 00:23:37.560
Town of Parish 1: I lost that

178

00:23:39.720 --> 00:23:41.820
Town of Parish 1: He also

179

00:23:42.930 --> 00:23:44.280
Town of Parish 1: That hearings.

180

00:23:45.990 --> 00:23:47.040
Are all right.

181

00:23:48.630 --> 00:23:51.300
Town of Parish 1: Go ahead and you stay in state.

182

00:24:20.640 --> 00:24:24.180
Town of Parish 1: As a bird. The revision or continuation of water.

183

00:24:25.530 --> 00:24:50.400
Town of Parish 1: And a newspaper articles in August we being water district. Number one, the car died or on board July eight me know, have all of our tender to saving for the town supervisor stated wants the board and now the bottom of the ocean water Denver one guy now the order

184

00:24:51.480 --> 00:24:58.890
Town of Parish 1: Water Management food, but that does not be exactly the same geographic area is desert want

185

00:24:59.910 --> 00:25:13.890

Town of Parish 1: And reply to a question like Don, Don, the supervisory Why don't sold on the water. Visit one day, but the area and that don't get water at that areas, including

186

00:25:15.540 --> 00:25:36.600

Town of Parish 1: The engineer to hire drop those plans and actively seeking guidance from the town for based on these are no better, I guess it would be the logical this Tom does not have a wall and then told what a public, there is no one there are two to refer to as a phone water.

187

00:25:37.650 --> 00:25:46.110

Town of Parish 1: Thousands of dollars a ton of money is Brian without any can work on the ball and this is all hearing and nine change.

188

00:25:47.730 --> 00:25:48.540

Town of Parish 1: Our money.

189

00:25:49.560 --> 00:25:54.060

Town of Parish 1: We have not accepted, where's the money coming from

190

00:25:55.950 --> 00:26:16.170

Town of Parish 1: I bought my hometown boy lines and then as a person and maybe. Listen, I have no idea what might be missing or what is being dead. But once again, rather than some of the goals project we have set for money. Now, what level of the run deja vu line.

191

00:26:17.430 --> 00:26:30.180

Town of Parish 1: I haven't told a bunch of the day, burning. There wasn't the engineering or lower engineering and the final now with injury from \$9.2 billion to 16.6

192

00:26:31.740 --> 00:26:52.770

Town of Parish 1: It also made an integration for all and edu or 639 to \$909 for the next 30 years. This was based on an increase of 129 to 500 to a meeting. You better not in my opinion room and

193

00:26:53.880 --> 00:27:04.710

Town of Parish 1: Then we should we should be conservative when it agrees 123 eating the way to master for here. If you go to school district one from 60

194

00:27:06.000 --> 00:27:16.800

Town of Parish 1: To 8180 round it off that it'd be about \$80,000 a year in reality we shouldn't pay for that. Now go back to

195

00:27:18.330 --> 00:27:25.200

Town of Parish 1: Having us do not need to incorporate the Raleigh instructing them.

196

00:27:26.310 --> 00:27:36.360

Town of Parish 1: For allowing any constructing to be excluded. In other words, if you don't meet the criteria or the cold. I think you'd be charged you

197

00:27:37.020 --> 00:27:50.220

Town of Parish 1: Can't grow them the random arranging the meeting us in a vertical maybe justified not not faced with the additional overall costs. These owners employer will then convert a girl in the duck.

198

00:27:51.630 --> 00:28:10.350

Town of Parish 1: Unless I get it. And this is born, which has been running water. I did mine on the byproduct. They will have a water management plan which will determine my water. Why then, this is your apartment design was used for one water. I'm wondering

199

00:28:11.490 --> 00:28:24.480

Town of Parish 1: How many books per household. If it goes way, the number of people on the D than three nations, there could be one to five people on the

200

00:28:26.400 --> 00:28:26.970

Other

201

00:28:29.730 --> 00:28:40.890

Town of Parish 1: Line very odd you are astronomical vision, who riding a \$16.6 million was single guarantee a graphical login through

202

00:28:41.490 --> 00:28:54.300

Town of Parish 1: State that is victims of dollars in debt apparent that it was devastating foundation. I don't think I don't believe it's the blame for this never ending second life of the bond.

203

00:28:55.110 --> 00:29:16.560

Town of Parish 1: There was voted down by Richard and John morning, otherwise we will land by getting one. I cannot lose Buster by \$7.4 million increase in many resident feeling was saying no. This project has been on board should have done their thing.

204

00:29:59.010 --> 00:30:07.770

Town of Parish 1: Okay, the first question how industrial property such as railroad property can be accessed by eating you

205

00:30:09.720 --> 00:30:16.050

Town of Parish 1: Rachel, do you want to, you know, there's a property in here than there were any definitely plan on running

206

00:30:23.070 --> 00:30:27.210

Town of Parish 1: Hello, I'm not sure what parcel they be talking about

207

00:30:33.210 --> 00:30:35.580

Town of Parish 1: They didn't. They didn't listen for

208

00:30:37.980 --> 00:30:43.140

Town of Parish 1: Property that would fit into that category. So, Jenna, the more general

209

00:30:44.550 --> 00:30:54.390

Town of Parish 1: Industrial party was classified in industrial the executive building their building was using water at assessing within

210

00:30:55.560 --> 00:31:01.350

Town of Parish 1: The essential you look at their water usage calculation per year based on based on rapper water.

211

00:31:03.270 --> 00:31:03.420

So,

212

00:31:08.640 --> 00:31:09.240

They

213

00:31:12.900 --> 00:31:13.260

Want

214

00:31:16.470 --> 00:31:17.220

Town of Parish 1: So with her.

215

00:31:18.990 --> 00:31:19.530

Town of Parish 1: Associate

216

00:31:20.550 --> 00:31:21.810

Town of Parish 1: Associated if it is that

217

00:31:23.370 --> 00:31:27.870

Town of Parish 1: That the question Lady didn't. There was no use that to that. Okay.

218

00:31:33.420 --> 00:31:36.570

Town of Parish 1: The next question we have here.

219

00:31:56.040 --> 00:32:09.240

Town of Parish 1: OK, the next question. How did you come up with the construction costs. The approximately 80% more than two year period. I work in the construction industry and I can cheer you there has not been that particular

220

00:32:09.870 --> 00:32:22.830

Town of Parish 1: Industry on Gregor like original I think that this is something I think, you know, we talked about in detail, but we didn't really explain this. I think it would be helpful to talk through the basis of the cosmic prison, a little bit more difficult.

221

00:32:25.800 --> 00:32:26.580

Town of Parish 1: So, yeah.

222

00:32:33.630 --> 00:32:36.600

Town of Parish 1: So we started looking at the cost

223

00:32:37.830 --> 00:32:55.230

Town of Parish 1: Structure for a blank slate. So we use them from various projects that have just been big area of investment project with an example and unstructured data you have an engineering firm, whose these types of projects for diversity.

224

00:32:56.490 --> 00:33:06.420

Town of Parish 1: And also had the figures. Once the password about figures here. You like water authority they

225

00:33:07.680 --> 00:33:32.670

Town of Parish 1: Are numerous projects they do out there for you that allows them to determine pricing place on the guy five meters is appropriate. He received updated walls or watch or his name and the other things that are going into the system is loud and other trash can. And that has to be updated.

226

00:33:33.990 --> 00:33:36.660

Town of Parish 1: But we we looked at from a blank slate with the pressure

227

00:33:41.370 --> 00:33:42.000

Thanks, Mike.

228

00:33:55.980 --> 00:34:06.300

Town of Parish 1: Can you please explain why at W's the five of us increase from six to be one that seems to be the boat, a big change.

229

00:34:16.350 --> 00:34:22.800

Town of Parish 1: So again, much like me to be updated practice legit. Look at us with a fresh

230

00:34:24.060 --> 00:34:31.710

Town of Parish 1: It's typically when you have commercial property in school property. Look at what their water and you might

231

00:34:35.550 --> 00:34:38.400

Town of Parish 1: You beat the number of emails, based on the water and

232

00:34:39.540 --> 00:34:47.880

Town of Parish 1: So we contacted at w and spoke with the buildings and grounds superintendent to find out what their music was and they told us.

233

00:34:48.240 --> 00:34:56.880

Town of Parish 1: Based on when they're in school. They use a range of anywhere between 12,015 thousand per day network and month period.

234

00:34:57.630 --> 00:35:03.870

Town of Parish 1: In the summer time. And there's obviously no Kennett there, but there is still some staff there they use about five out again today.

235

00:35:04.500 --> 00:35:14.970

Town of Parish 1: So we use the average for that full 12 months to figure out what their actual usage per day, which was a little under

236

00:35:15.900 --> 00:35:35.400

Town of Parish 1: Pulled out of 100 gallons per day and we compare that to what a typical single family house with us. And typically, in this area, it's about 150 gallons per day. So when we take what their average usage is divided by one single family with us. That's about 81 us

237

00:35:38.070 --> 00:35:38.550

Town of Parish 1: In three

238

00:35:52.320 --> 00:35:58.080

Town of Parish 1: Sure. Um, so the way he calculated previously didn't really line up with guidance.

239

00:35:59.160 --> 00:36:01.410

Town of Parish 1: From the funding agency specifically us

240

00:36:02.850 --> 00:36:07.560

Town of Parish 1: So when we look at this with a fresh set of eyes. We looked at it. Also, with their guidance.

241

00:36:14.700 --> 00:36:23.760

Town of Parish 1: You know, that's one of the pieces for this private versus the one we mentioned last time we were looking at too weird. We're not done with us a most safe.

242

00:36:24.300 --> 00:36:37.650

Town of Parish 1: USDA product. So when they tell you. Okay. We don't want to apply for this grant. This is what you gotta do. And that's what made the difference and how they're looking at that we didn't do that. Last time we were looking at USDA, we are

243

00:36:45.720 --> 00:36:46.920

Town of Parish 1: Short, not offline.

244

00:36:49.530 --> 00:37:03.120

Town of Parish 1: So the next question you say the words again for grants the cost to go down. I would have to assume that the research was fully done at all.

245

00:37:04.140 --> 00:37:05.850

Town of Parish 1: So I can talk about that.

246

00:37:07.200 --> 00:37:20.700

Town of Parish 1: With the board. So the class that are presented assume certain amount of funding and that is a scenario that I think we feel is realistic.

247

00:37:22.950 --> 00:37:37.680

Town of Parish 1: Additional one day may come in, but it's not a guarantee. And we can't presented scenario are going to vote on it is the meditation even present the most conservative day so

248

00:37:38.340 --> 00:37:52.410

Town of Parish 1: The price. Use your costs and what is being presented based on the lightly funding scenario. So, you know, that's what we're talking about here in the direction work, you know, to turn to develop

249

00:37:54.150 --> 00:37:57.480

Town of Parish 1: Is there anything any board members wanted to add to that.

250

00:38:01.140 --> 00:38:01.470

Right.

251

00:38:05.520 --> 00:38:08.520

Okay, let's see if there's any additional questions here.

252

00:38:11.700 --> 00:38:24.660

Town of Parish 1: Questions about the cost of the town page so far for engineering Services Center. I can talk about a little bit of energy and you'd like to put like some of the work ahead.

253

00:38:26.040 --> 00:38:26.490

Town of Parish 1: Sure.

254

00:38:28.140 --> 00:38:28.770

Town of Parish 1: So,

255

00:38:29.850 --> 00:38:31.860

Town of Parish 1: Sorry about that kind of awkward.

256

00:38:34.800 --> 00:38:35.340

Town of Parish 1: Weird

257

00:38:36.360 --> 00:38:37.110

Town of Parish 1: So,

258

00:38:38.880 --> 00:38:51.270

Town of Parish 1: I mentioned sort of the sequencing of how some of this stuff has to work because there's a bunch of boxes that have to check

basically to apply for the funding if you don't complete these and you literally cannot apply for the grant funding.

259

00:38:51.810 --> 00:39:04.020

Town of Parish 1: And those things include completing a preliminary engineering report that's all important. You have to have a project budget is up to date and current

260

00:39:04.830 --> 00:39:15.540

Town of Parish 1: You have to complete your environmental review process or what is commonly referred to as the seeker and then the board has to pass the bond revision.

261

00:39:16.380 --> 00:39:35.520

Town of Parish 1: Those all of those might have to be completed in order for a community to be able to apply for grant funding for this. And so given that there had been a delay. And so let me let me go back and talk about what had been done before so Miller engineering report was completed.

262

00:39:36.570 --> 00:39:39.690

Town of Parish 1: An evolutionary engineering report was completed. Some time ago.

263

00:39:40.260 --> 00:39:52.920

Town of Parish 1: And one of the costs that was encouraged was to complete speaker. And there's actually another artist, the environmental review that the federal government records for USDA

264

00:39:53.160 --> 00:40:00.600

Town of Parish 1: Public environment, our pork and that's pretty expensive than that, actually. So that was part of what had had to be done by the town.

265

00:40:01.290 --> 00:40:10.740

Town of Parish 1: That was completed that one of those boxes that had to get checked the grant funding and then when the bond resolution got voted down

266

00:40:11.430 --> 00:40:15.060

Town of Parish 1: And I was brought on board by the town to come in and kind of look at this

267

00:40:15.990 --> 00:40:25.290

Town of Parish 1: There had been so much time and have gone on since the original engineering report was done in the process of it was no longer valid that affected everything

268

00:40:25.650 --> 00:40:38.070

Town of Parish 1: So that's when the town went out on data request for proposal selected Bernie her to work with the process update that processes and because of that concept that is not good.

269

00:40:38.550 --> 00:40:48.330

Town of Parish 1: At the whole project basis with the project, all of the documentation all the grant funding and then apply for everything is for nothing. That number has got to be good.

270

00:40:49.110 --> 00:41:00.270

Town of Parish 1: That's the base of everything when funny agency look at grants. Look at what your total cost that you're going to pay a fee. So if your budget positive on your estimated

271

00:41:00.600 --> 00:41:07.950

Town of Parish 1: Your grant funding that you're going to get is not going to be set up appropriately and the whole call apart so

272

00:41:08.490 --> 00:41:15.000

Town of Parish 1: You know, this is sort of the foundation of everything you guys have anything to add to this will remember but

273

00:41:15.480 --> 00:41:27.630

Town of Parish 1: That process is critical. And it also has to take into account when the project is actually going to go to construction. So we didn't talk about the project schedule. But I think that would be helpful too because

274

00:41:28.170 --> 00:41:33.360

Town of Parish 1: Given the cycling of the funding agencies when for example this year because of the

275

00:41:34.380 --> 00:41:48.090

Town of Parish 1: One of the funding sources that we have for mention that actually wasn't even available words here so that that funny actually normally comes out in September year that was not available this year so

276

00:41:48.900 --> 00:41:57.300

Town of Parish 1: The cycling of when a project. So you can go to construction has to line up with when these grants actually get applied for and awarded

277

00:41:57.510 --> 00:42:06.360

Town of Parish 1: And many of them are only offer there's only one time of year when these applications to be submitted. So you have to have all your boxes checked.

278

00:42:06.630 --> 00:42:22.080

Town of Parish 1: And have all your stuff done by that deadline and when that green application comes in. So this dry scheduled for all of these municipal water private English word of projects that you've done know throughout the state and throughout the country.

279

00:42:23.310 --> 00:42:28.890

Town of Parish 1: Anything you guys want to add in version one talk a little bit about project schedule all you just mentioned.

280

00:42:30.660 --> 00:42:31.260

Town of Parish 1: Sure.

281

00:42:39.660 --> 00:42:42.600

Town of Parish 1: This is several years to complete.

282

00:43:07.680 --> 00:43:10.050

Town of Parish 1: We're finding out that the process that we follow

283

00:43:12.300 --> 00:43:13.590

Town of Parish 1: The process that we shouldn't

284

00:43:14.760 --> 00:43:20.250

Town of Parish 1: Have that's why for me know all these guys from the town supervisor to do, why project.

285

00:43:20.970 --> 00:43:29.700

Town of Parish 1: I don't know the stuff that's where we're hiring professionals together to make sure we do it right, including legal counsel on some of the comments that were made it

286

00:43:30.210 --> 00:43:43.140

Town of Parish 1: I made statements that are based on your recommendation or suggestion or more direction we should be free. After the boat went down, know the the project was voted on by

287

00:43:44.190 --> 00:43:53.400

Town of Parish 1: Establishing water. Number one, and we voted me to approve the resolution. My understanding is she supposed to be and

288

00:43:54.510 --> 00:44:03.420

Town of Parish 1: That's why this word in the room to do at the December 17 we will make a decision and we're going to approve and increasing the

289

00:44:07.170 --> 00:44:10.290

Town of Parish 1: Cost of the project and they pass the balance sheet.

290

00:44:12.450 --> 00:44:21.600

Town of Parish 1: Now we've got an increase apostle they vote on it and 73 increase it, then it will go to the voters, they will know, doing a supermajority

291

00:44:22.950 --> 00:44:23.520

Town of Parish 1: I'm sorry.

292

00:44:30.030 --> 00:44:46.200

Town of Parish 1: Why did this big one was approved by the voters based upon the previous engineering board and funding potential new voted on. Yes, it was approved and why. Number one was legally born and instill legally in existence with the boundaries of me engineers indicated

293

00:44:47.340 --> 00:44:54.690

Town of Parish 1: When we have if we're going to move forward. We've got to increase the cost that was approved before from the 916 of

294

00:44:55.350 --> 00:45:04.230

Town of Parish 1: The town, more than four and following the public hearing an order approving increase costs cost and the increased cost per partial

295

00:45:04.980 --> 00:45:13.170

Town of Parish 1: If they approve that order, then that's that's the proposition is going to go to the mothers that you will lower down after them.

296

00:45:13.590 --> 00:45:26.970

Town of Parish 1: To either approve or disapprove, the increase in the hall and the increased. For edu. And just to clarify one other common bond revolution by law has to be for the whole project.

297

00:45:27.960 --> 00:45:50.040

Town of Parish 1: That doesn't be the fountain borrowed a full project costs to get a report. So the grants don't come in, based upon what the engineers that students are even if you approve the three spot the project going to go for it. If it, if it goes above the \$988 for you that then you approve it.

298

00:45:57.420 --> 00:45:57.720

Town of Parish 1: Yeah.

299

00:45:59.730 --> 00:46:05.430

Town of Parish 1: This is Daniel the project of this size based several years.

300

00:46:06.540 --> 00:46:15.000

Town of Parish 1: Yeah. For quite a lot of Wayne mile, it needs to go into the ground and water storage. Take another version.

301

00:46:16.020 --> 00:46:30.930

Town of Parish 1: And we all know the construction season here is fairly limited. Sometimes, more so than others. So we anticipate a truck possible brought out for a few years of point 23 in our costume.

302

00:46:32.190 --> 00:46:36.330

Town of Parish 1: That either implicitly future increases.

303

00:46:37.350 --> 00:46:41.610

Town of Parish 1: Based upon inflation and general

304

00:46:42.750 --> 00:46:44.340

Construction over time.

305

00:46:51.450 --> 00:46:52.380

Town of Parish 1: I just wanted to

306

00:46:54.690 --> 00:46:57.540

Town of Parish 1: Check that question from the audience.

307

00:46:58.800 --> 00:47:03.420

Town of Parish 1: might repeat the question. You can always hear the questions.

308

00:47:04.950 --> 00:47:05.250

Town of Parish 1: Okay.

309

00:47:06.570 --> 00:47:09.540

Town of Parish 1: We're still a few more questions even earlier.

310

00:47:11.430 --> 00:47:12.420

Town of Parish 1: About the way

311

00:47:34.920 --> 00:47:37.890

Town of Parish 1: We've heard about her mission or anything question.

312

00:47:42.060 --> 00:47:56.670

Town of Parish 1: Oh, this is it. So here's, here's another question, why me dig up the road for water cannot put it natural gas at the same time, I'm sure, very few with those natural gas being installed many who are against water man with the blue.

313

00:47:58.080 --> 00:48:09.930

Town of Parish 1: I can. So I know you guys can talk to them. We get asked this all the time. If it's not natural gas goes well, I am the road when we will wait for it to whatever I can just do the water is worth

314

00:48:11.370 --> 00:48:20.160

Town of Parish 1: Or any any said buried in the switches and routers. So pretty good reasons why this doesn't happen even though you know any aspect you look at this

315

00:48:20.640 --> 00:48:25.710

Town of Parish 1: Logical want we wanted to to load up one spot. A lot of it goes back to

316

00:48:26.190 --> 00:48:35.820

Town of Parish 1: The funding sources that are available to these projects for completely different state. And this isn't anything to municipalities have control over this comes from the state.

317

00:48:36.180 --> 00:48:44.400

Town of Parish 1: And federal government. They're not the same funding. There's also the requirements of separation distance between utility. So a lot of times is

318

00:48:45.000 --> 00:48:56.130

Town of Parish 1: Completely not practical. Because there is infrastructure internationally going in the same track. So you're talking about why I'm sure there's a minimum 10 separations before

319

00:48:57.120 --> 00:49:09.750

Town of Parish 1: I actually never seen the fan. I haven't updated it wasn't grant funded project and mining and I've been doing this for 25 years and I have never actually been that had been

320

00:49:10.470 --> 00:49:13.470

Town of Parish 1: On a municipal project private side. It's a lot

321

00:49:14.010 --> 00:49:32.730

Town of Parish 1: Of them came around and they absolutely wouldn't be doing it that way. But these mystical projects require state and federal money. And so they're very specific requirements that have to be done usually just line up that way it's possible today, you guys have anything had been

322

00:49:34.920 --> 00:49:35.880

Town of Parish 1: Very good. I had something

323

00:49:42.450 --> 00:50:02.130

Town of Parish 1: I need is a call back to the original mission. I can tell you that there has been interested in the past, natural gas Perry and we ever parish in mind that up. Unfortunately, there seems to be just about zero trust problem national grid to put in the National Grid or

324

00:50:03.180 --> 00:50:06.090

Town of Parish 1: Natural gas and the accountability.

325

00:50:10.620 --> 00:50:19.350

Town of Parish 1: Hey, thanks bomb diggity about attacking magic number for that the everyday person. I think if it is the same one you want to check it out, Rachel.

326

00:50:21.000 --> 00:50:27.240

Town of Parish 1: Dot 07 dash your 901. Okay, great.

327

00:50:30.150 --> 00:50:48.480

Town of Parish 1: The next question is my understanding. Stay not proceeded with the road slash sidebar Patrick proposed 12 years ago, due to the decision in the water is this tour. I'm not sure what this question for any of the board members are

328

00:50:54.090 --> 00:50:54.360

Yeah.

329

00:50:58.080 --> 00:51:20.460

Town of Parish 1: Those are the culture 20 years ago and these two young men shape or 69 and other two are really not connected with the time that this project is just about to go are taking on a design drawings and public meetings and there's a technical problem statement because there is a disaster.

330

00:51:22.560 --> 00:51:33.840

Town of Parish 1: In Bridgend OF THE CITY IS THREE RIVERS outside of Baltimore, though, was determined to be particularly problematic and do it was for to put the monies that are

331

00:51:34.920 --> 00:51:51.480

Town of Parish 1: Lining up for their project into that project and Stephen has prepared visit me again, back to the States for a daughter or son said it's built on the project, they're planning on doing but it's not that one of the priorities products compared to some of the Iraq.

332

00:51:52.650 --> 00:51:53.460

Town of Parish 1: More efficient.

333

00:51:54.690 --> 00:51:56.310

Town of Parish 1: road conditions there.

334

00:52:05.760 --> 00:52:28.020

Town of Parish 1: Create an expert in the town done any research into the diminishment of guys that will occur when we all take on additional fees approximately \$35,000 versus a week House since most homes have been most we are asked to take on debt with no appreciable benefit.

335

00:52:29.340 --> 00:52:33.540

Town of Parish 1: Not sure what they mean by the \$35,000 cost.

336

00:52:35.400 --> 00:52:36.090

Town of Parish 1: That bill.

337

00:52:37.410 --> 00:52:38.400

Town of Parish 1: did last year.

338

00:52:40.860 --> 00:52:41.640

This year,

339

00:52:42.990 --> 00:52:49.650

Town of Parish 1: It's the \$35,000, just to clarify on a cost per EU the the \$900

340

00:52:50.790 --> 00:52:59.550

Town of Parish 1: Change it per year. That is the all in cost included debt and operation maintenance. Right.

341

00:53:02.040 --> 00:53:22.800

Town of Parish 1: And then the only additional for the homeowners would have cost to install their last from the party line and versa into their home crack. Okay. So just to be clear, total cost for us. The, the \$988 Jake

342

00:53:25.410 --> 00:53:32.040

Town of Parish 1: Just one second. I just want to finish the on my machine bespoke event or pathways that I wanted to read into the record.

343

00:53:35.460 --> 00:53:45.450

Town of Parish 1: Has it may consider that during me and again when construction costs are so high. And so, though. People are financially struggling would not be the best time to pursue this project.

344

00:53:46.440 --> 00:54:00.990

Town of Parish 1: I don't know if the board would like to speak. Then you guys. That's why you're putting his bag out to the voters. The folks in the water district can decide whether they want to proceed or done anything you want to add period.

345

00:54:06.060 --> 00:54:22.110

Town of Parish 1: That's one of the reasons why we are. We are. We're not going to make the decision to do this without you giving us permission, we might go to increase that class to \$16,000 is one of the

346

00:54:23.760 --> 00:54:24.960

Town of Parish 1: Way we may

347

00:54:27.780 --> 00:54:36.930

Town of Parish 1: We may may have to do that, but you're going to give us permission to move forward. And if you give us permission to move on and none of the bands come in.

348

00:54:37.560 --> 00:54:45.600

Town of Parish 1: We're not going anywhere. We can't parishes, that must be you know somebody that's got a lot of money and wants to donate parish militia town.

349

00:54:46.110 --> 00:55:01.680

Town of Parish 1: We can't do it without the glands. So it's going to be continuing on. We say yes to increasing it to 16 million whatever you give us permission to do the do the role that you want the water and we get the grants. If we don't get none of those

350

00:55:02.940 --> 00:55:05.070

Town of Parish 1: Things. It's not for me. I'm

351

00:55:08.010 --> 00:55:08.340

Town of Parish 1: Sure.

352

00:55:19.080 --> 00:55:19.740

Town of Parish 1: Variations

353

00:55:22.050 --> 00:55:28.530

Town of Parish 1: My name on the Super Bowl. They don't you I have a lot of questions that I have

354

00:55:30.120 --> 00:55:31.830

Town of Parish 1: Because I don't understand this.

355

00:55:33.150 --> 00:55:43.710

Town of Parish 1: Week's about what we got this letter is the first time I heard they may be done this cost would go from less than \$1,000 to almost \$75,000 a year.

356

00:55:44.940 --> 00:55:59.760

Town of Parish 1: And the person in the backstage correctly, then that constantly active. So I don't understand how you can have both if everybody partners, we might help. But I'm going to have my evil bows.

357

00:56:00.780 --> 00:56:19.980

Town of Parish 1: And this, but then the school district owes taxes, but then the public, which could say, okay, we don't have. They don't understand. It's a lot of money every year \$75,000 it's a one and a half percent tax increase for our students.

358

00:56:21.480 --> 00:56:24.990

Town of Parish 1: And snack nation. We're going to use the one

359

00:56:26.670 --> 00:56:27.450

Did anybody know

360

00:56:28.950 --> 00:56:34.590

Town of Parish 1: We were going to use the water. Water is less than \$1,000 a year, but it's \$75,000 a year.

361

00:56:35.700 --> 00:56:39.420

Town of Parish 1: If the taxpayers don't pay for. We were not going to use the one

362

00:56:40.980 --> 00:56:41.880

Town of Parish 1: I knew I was going to extend

363

00:56:48.540 --> 00:56:49.050

Town of Parish 1: Yeah.

364

00:56:50.160 --> 00:56:59.880

Town of Parish 1: So, so, yeah. I mean, the cost would go to taxpayers, but we don't we don't have a boat. Your day every may have our budget road.

365

00:57:03.690 --> 00:57:05.400

Town of Parish 1: I don't need one.

366

00:57:06.840 --> 00:57:07.800

Town of Parish 1: More month I

367

00:57:09.420 --> 00:57:13.440

Town of Parish 1: I don't know the whole time. I don't know. I don't know.

368

00:57:20.850 --> 00:57:21.750

Town of Parish 1: Yeah.

369

00:57:22.860 --> 00:57:23.130

Town of Parish 1: Yes.

370

00:57:24.900 --> 00:57:31.110

Town of Parish 1: I don't know if it would only be the residents of parish staff would increase i don't know i mean

371

00:57:33.000 --> 00:57:33.810

Town of Parish 1: Every go to

372

00:57:40.620 --> 00:57:48.810

Town of Parish 1: What will happen, and he is the residents within the district are the only ones that have a right to vote as to whether we increase the cost

373

00:57:49.800 --> 00:58:07.170

Town of Parish 1: Of the project and the possible edu the school district within is within the district, but its body is made by taxpayers across the division. So yes, the interest in the school tax taxes or increase because they had an increase costs.

374

00:58:08.190 --> 00:58:18.360

Town of Parish 1: For them for the water, then yeah abortion bag and response is going to be spread out to the various Jewish Studies fullback that's that's just good work.

375

00:58:20.400 --> 00:58:22.800

Town of Parish 1: And school lizard voting.

376

00:58:25.350 --> 00:58:38.970

Town of Parish 1: So I understand them with the letter history of the property owners within the property within the water district are going on the proposition is going to be before that I'm going to solely to increase the cost of the project and the possibility

377

00:58:40.410 --> 00:58:49.980

Town of Parish 1: To go back. You can be different factors for that records that meet your own and you're just going to began until I think

378

00:58:53.520 --> 00:59:09.870

Town of Parish 1: Last time we did as there was a representative at an invalid to represent me there wasn't a super that I have no idea was the president of the board. I don't know that they assign someone to vote for. So they will have

379

00:59:10.950 --> 00:59:11.190

Town of Parish 1: No.

380

00:59:17.700 --> 00:59:26.670

Town of Parish 1: Intention of yours and wireless number one will be loading the rest of us who don't with a water district. Number one, you know, same

381

00:59:31.680 --> 00:59:32.580

Town of Parish 1: Thing correctly.

382

00:59:38.100 --> 00:59:47.430

Town of Parish 1: Right, so they don't know, they don't know they've. Oh, yes. Oh, yes, the majority people in water district, number one, are the ones that are going to make the decision.

383

00:59:50.790 --> 00:59:53.490

Town of Parish 1: To say school dances, I'm talking

384

01:00:02.610 --> 01:00:03.570

Town of Parish 1: Absolutely.

385

01:00:04.620 --> 01:00:07.140

Town of Parish 1: It's going to impact the school districts bug. Yes.

386

01:00:08.250 --> 01:00:22.050

Town of Parish 1: Any other costs incurred is going to impact the budget that the property owners pay your school taxes. So to the extent that school district may or may not be benefited by the largest

387

01:00:22.860 --> 01:00:38.760

Town of Parish 1: The entire school district and they may not depending on how you look at, but as part of it is going to be partner school districts budget is a as a matter of municipal law that has to be spread across the entire school district managers, just pick one.

388

01:00:39.780 --> 01:00:53.850

Town of Parish 1: But that's what subsidized control account. That's what the school district has to the time I have to assess their budget in and pay for that reason to the cool part of the schools operations is going to be to cost a lot when it is

389

01:00:55.980 --> 01:00:57.000

Washington right now.

390

01:00:59.190 --> 01:01:10.590

Town of Parish 1: I'm sorry, I just don't understand. See the budget, we don't set a budget budget, but then the voters vote on budget. So they voted down. We can't pay

391

01:01:16.830 --> 01:01:21.450

Town of Parish 1: This is not the first time the water district has been formed that had a school of

392

01:01:22.530 --> 01:01:32.520

Town of Parish 1: Fish every water district that ever been for good for exactly the same way. And when I say

393

01:01:33.720 --> 01:01:42.180

Town of Parish 1: What the purpose of, you know, trying to communicate the information Joe mentioned the town doesn't have any

394

01:01:43.380 --> 01:01:44.700

Town of Parish 1: Ability to modify

395

01:01:45.840 --> 01:01:53.430

Town of Parish 1: This is municipal is the process legally in your state didn't have to go through to form a water.

396

01:01:54.330 --> 01:02:02.580

Town of Parish 1: And that folks are going to go in accordance with the law and they're going to decide whether they want to move forward or not.

397

01:02:03.180 --> 01:02:10.710

Town of Parish 1: And as Joe said, and those those costs are and making the school right so that's information that

398

01:02:11.370 --> 01:02:20.670

Town of Parish 1: I would say every voter should take that into consideration if that is something that is concerning to or, you know, basically.

399

01:02:21.150 --> 01:02:28.950

Town of Parish 1: Well, I think the board is trying to do is provide folks in the district with the information that they need so they can make an informed decision.

400

01:02:29.610 --> 01:02:41.790

Town of Parish 1: I've said it many board meetings for the Board Members have said, you know, this isn't our decision to make. We want to let the

people that are impacted by this made the decision to the folks from our district.

401

01:02:42.300 --> 01:02:48.420

Town of Parish 1: I think that's why they're bringing this information. How's everybody to try to present all of the information

402

01:02:49.470 --> 01:02:56.430

Town of Parish 1: Or for somebody that is impactors school Catholic that this is a valid weekend, something that should mention because

403

01:02:56.880 --> 01:03:10.380

Town of Parish 1: That is one of those factors that people should consider for somebody else that maybe doesn't have drinking water and the Welsh right they may be willing to have higher school taxi may be willing to pay.

404

01:03:11.040 --> 01:03:21.360

Town of Parish 1: To use your cars because that's important to them. But that's what every voter has to take all of those facts into consideration, making important decisions. Though I do want to make sure

405

01:03:21.990 --> 01:03:33.540

Town of Parish 1: The purpose of today really isn't too baby issues and try to make sure that everybody gets their questions answered. And we still do have quite a few more questions that are there online. So I'll turn it back over to the different minutes you hear me.

406

01:03:34.560 --> 01:03:35.970

Okay, great. Thank you.

407

01:03:49.590 --> 01:03:54.870

Town of Parish 1: Okay, the next question is, will there be absentee ballots available for the boat. Yes. How do I get one.

408

01:04:01.500 --> 01:04:06.480

Town of Parish 1: Yes, there will be had to be that now available will be available in the Town Clerk's Office.

409

01:04:08.010 --> 01:04:13.590

Town of Parish 1: Assuming the board approves move forward, instead of the election, they

410

01:04:15.000 --> 01:04:15.330

There were

411

01:04:21.270 --> 01:04:23.280

Town of Parish 1: One thing keeping

412

01:04:24.750 --> 01:04:35.490

Town of Parish 1: I understand energy balance for Central District. The legend in south of the border decide whether this on the finance side available this go around.

413

01:04:47.220 --> 01:04:48.600

Town of Parish 1: The board decided to do the

414

01:04:49.860 --> 01:04:57.420

Town of Parish 1: Discovery call that, you know, people may not want mom can't blame them. But that's an illusion. I didn't know we get a choice. The last

415

01:04:58.830 --> 01:05:01.320

Town of Parish 1: But there's one over the game.

416

01:05:07.980 --> 01:05:09.210

Town of Parish 1: People now where

417

01:05:11.910 --> 01:05:14.790

Town of Parish 1: Is your class. She will read.

418

01:05:21.000 --> 01:05:21.390

Town of Parish 1: The next

419

01:05:22.500 --> 01:05:37.680

Town of Parish 1: This is more of a standalone but I'm just not sure that if there's a question here. Look, look around in a building. And what you see in one down under eating shy and you need to work. This is not an apple community. Do you really think you can afford this.

420

01:05:38.790 --> 01:05:53.130

Town of Parish 1: Whatever, whatever they did it kind of goes back to the state that I mean, for which is the four pillars of this is a decision that the folks who would be impacted by this, which is those folks in the water should make that decision as to why they decided to go

421

01:05:55.950 --> 01:06:09.930

Town of Parish 1: Another question 930 900 \$900 30 days, you're just adding How long are those breeze be being raised me and effect word so

422

01:06:10.440 --> 01:06:23.520

Town of Parish 1: What I say that is the but that costs in the first year, use your race. Race to not go down and if anybody tells you that they go down and they're not telling you the truth of the matter.

423

01:06:23.850 --> 01:06:33.000

Town of Parish 1: And all you have to do is look around at your other bills that you receive and you see that they don't go down flavor class. Don't go down.

424

01:06:33.480 --> 01:06:41.400

Town of Parish 1: I'm part of the class for the water because it is the day operation and maintenance and the purchase of the water from Auckland.

425

01:06:42.000 --> 01:07:00.990

Town of Parish 1: And off. Go ahead, estimated. They asked me to their costs are going to be results. Oh, so I think there is a verb, remember correctly was 3% 3% per year. An estimated a restatement not in the deck that will be the same for the eternal along that doesn't increase

426

01:07:01.530 --> 01:07:13.440

Town of Parish 1: Along, but the operation and maintenance costs are going to increase. So that is something that all of these are should be well aware and not being they're going to pay will not be \$900 38 years

427

01:07:15.180 --> 01:07:17.280

Town of Parish 1: Probably practical operation and maintenance over time.

428

01:07:18.990 --> 01:07:23.490

Town of Parish 1: And that's what we see in all of the districts decision, you know, in other communities that we work in

429

01:07:24.630 --> 01:07:36.570

Town of Parish 1: Now one thing that can happen. No, and don't want to say that this will happen. But if there's growth, then the usual costs could could go down.

430

01:07:36.990 --> 01:07:48.060

Town of Parish 1: On it. That's because the majority of your costs are fixed costs of debt. So if there's a development that happens in the area, because now there's water available and businesses.

431

01:07:48.360 --> 01:07:56.610

Town of Parish 1: Over and things like that to happen, then you're taking those fixed costs are divided over learner. Number eight of us, but I would not

432

01:07:57.240 --> 01:08:07.950

Town of Parish 1: And I'm sure you guys are saying, you know, you don't. That's not something that we would say you can paint on that, again, in fact, to the conservative giving you the conservative information that's what we want to present

433

01:08:08.340 --> 01:08:13.500

Town of Parish 1: The sort of the worst case scenario, you wouldn't want to paint a rosy picture than we think it's going to be. If that happens,

434

01:08:13.770 --> 01:08:27.330

Town of Parish 1: It's great. That's great. But it's not anything that you can guarantee to people and say hey yeah this is going to happen in your rates are going to go down. So, so we would not present that as sort of a reasonable scenario.

435

01:08:30.600 --> 01:08:38.760

Town of Parish 1: Let's see, there's any other questions here. Oh, this is a good question. Is it \$900 cost only for the people in the water district. That's correct.

436

01:08:39.030 --> 01:08:51.780

Town of Parish 1: So, only the people in water district pay it gives you a cross. It's not something that shows up on your general tab so so it's a special district and that cost is only assessed and people that are in the district.

437

01:08:52.890 --> 01:08:53.520

Town of Parish 1: There's a question.

438

01:08:57.060 --> 01:08:57.450

Can

439

01:08:58.800 --> 01:08:59.370

You say,

440

01:09:19.980 --> 01:09:23.880

Town of Parish 1: Question is do you pay the \$900 when you hook up or not. The answer to that is

441

01:09:24.180 --> 01:09:38.520

Town of Parish 1: No. Who would pay a portion of that cost. So the if you don't hook up to the water you guys jump in if I say this up but I mentioned the total cost includes the debt and operation and maintenance.

442

01:09:38.880 --> 01:09:54.450

Town of Parish 1: So typically, the one eating, you would pay only to get they would not do that because you're not actually using any water so it would be a portion normally would. What would be assessed of the total cost for you right you know what

443

01:10:05.280 --> 01:10:06.240

Town of Parish 1: \$8

444

01:10:07.500 --> 01:10:08.040

Town of Parish 1: How much

445

01:10:10.680 --> 01:10:13.800

Town of Parish 1: Money and so you can subtract that out if you didn't

446

01:10:15.390 --> 01:10:18.390

Town of Parish 1: Pay that difference of that for the debt.

447

01:10:20.820 --> 01:10:21.330

So,

448

01:10:25.020 --> 01:10:25.860

Town of Parish 1: Yes. That includes

449

01:10:28.410 --> 01:10:39.420

Town of Parish 1: Everything. Right. So the question was does the \$909 include every night. And the answer is yes, and I are \$9 a month usage and includes that includes everything

450

01:10:42.180 --> 01:10:49.830

Town of Parish 1: Yeah, and that's that's for you, which is assuming 150 gallons per day for you, which is pretty conservative number

451

01:10:58.050 --> 01:11:01.110

Town of Parish 1: So the question is, if you use more than 150

452

01:11:03.090 --> 01:11:09.450

Town of Parish 1: That depends on how the town decides to set up their billing and restructure every community.

453

01:11:09.810 --> 01:11:16.260

Town of Parish 1: makes those decisions on how they're going to build a frequency of building, how much of their costs are going to bill is fixed, how much

454

01:11:16.770 --> 01:11:30.900

Town of Parish 1: Bill is variable on every today doesn't a little bit differently. So I can. So I'll give you a few examples. Just so you have some idea of how this works, and some other community. So a lot of communities will say,

455

01:11:32.310 --> 01:11:45.930

Town of Parish 1: Most communities that we work with. Go quarterly and they will build a set amount. So they would probably take like the 909 divided by four and now that we are charged that you would pay if you use up to

456

01:11:46.380 --> 01:11:58.110

Town of Parish 1: A certain number of gallons per day that quarter, you would just pay that set fee. Okay, like a single family house if you use over that they would set up rate per gallon with maybe

457

01:11:58.470 --> 01:12:06.480

Town of Parish 1: 1000 down and it might be something like a buck 50 per 1000 gallons over that that you pay extra, extra usage church.

458

01:12:08.880 --> 01:12:15.390

Town of Parish 1: Usually most community. What we see in the north country we I will take a beating around

459

01:12:16.110 --> 01:12:30.270

Town of Parish 1: Quite a bit less than hundred 50 gallons per day. We usually around 25 gallons per day for you. So 150 is a, you know, more conservatives make unless you have a bunch of teenage girls in your house, then all bets are off.

460

01:12:32.940 --> 01:12:33.510

Yeah.

461

01:12:36.210 --> 01:12:38.430
Town of Parish 1: Does that answer your question. Yes.

462
01:12:46.140 --> 01:12:46.500
Where

463
01:12:47.910 --> 01:12:53.250
Town of Parish 1: Did you say that the final resolution for 9.6 million was back to

464
01:12:55.530 --> 01:13:02.910
Town of Parish 1: Normal renewal. Yeah, so, uh, I just wanted to repeat the question I get the question was, was the original bond resolution has

465
01:13:03.330 --> 01:13:17.520
Town of Parish 1: The answer to that is the original bond resolutions, when it was first foot forward did not pass by supermajority Bennett was brought back again with the current board. I don't remember the exact date of that.

466
01:13:20.880 --> 01:13:24.750
Town of Parish 1: resolution was passed at that time by supervisory board.

467
01:13:31.980 --> 01:13:39.690
Town of Parish 1: You pay this was a real controversial thing when we went through this before about how much you pack.

468
01:13:40.860 --> 01:13:46.500
Town of Parish 1: And one answer was, there's like a cold this young lady only partial

469
01:13:47.550 --> 01:13:58.410
Town of Parish 1: The other answer was, if they want paper you're gonna you're gonna pay the \$909 all I'd ask you to do is research, a little bit more

470
01:13:59.790 --> 01:14:00.390
Town of Parish 1: Because I don't

471
01:14:02.160 --> 01:14:03.210
Town of Parish 1: Want to make sure

472

01:14:05.160 --> 01:14:17.310

Town of Parish 1: So the question I think was, you know, are real sure how the cost would be applied if someone didn't catch with the piper intruder, you're correct.

473

01:14:17.790 --> 01:14:23.100

Town of Parish 1: And I can say because you guys jump in here. But yes, I'm

474

01:14:23.340 --> 01:14:36.870

Town of Parish 1: Positive that that's the way that it works because that's the way that works on every water and sewer project that I've been involved in in your last 25 years they did not pay the operation and maintenance costs, Joe. Anybody else want to jump in.

475

01:15:02.610 --> 01:15:13.770

Town of Parish 1: Fusion or maybe it was not clear whether they were going to pay the full cost plus additional costs for usage and how much they were going to pay

476

01:15:14.220 --> 01:15:21.030

Town of Parish 1: Off the fixed costs and variable costs, what I, what I can tell you is that engineering report.

477

01:15:21.870 --> 01:15:27.390

Town of Parish 1: The miller engineering for the original engineering report that was done included all of the

478

01:15:28.080 --> 01:15:36.720

Town of Parish 1: operation and maintenance and the debt costs. The total number that was presented that I obviously wasn't there for those public meetings. I don't know how that was communicated

479

01:15:37.440 --> 01:15:40.980

Town of Parish 1: Yes, I can't really talk about that, but I can't tell you how

480

01:15:41.700 --> 01:15:55.320

Town of Parish 1: They've done all of these other projects that I've been involved in and Joe's been involved in a PCA, we could have been done exactly the same way. We're talking about how it would be done now, so I can't really speak about who said previously,

481

01:15:56.700 --> 01:16:01.920

Your go back and review, they get property was charging

482

01:16:03.900 --> 01:16:07.920

For it. You have a house. It's a poly edu even though you don't want

483

01:16:08.970 --> 01:16:10.800

Town of Parish 1: That correct. So making

484

01:16:11.820 --> 01:16:12.210

Town of Parish 1: It.

485

01:16:13.740 --> 01:16:22.830

Town of Parish 1: So there was a comment made about non billable non billable lot do not pay a happy to you. And there's a process that municipalities have

486

01:16:23.100 --> 01:16:28.770

Town of Parish 1: That I then worked through with many communities because when this when a district goes into effect.

487

01:16:28.860 --> 01:16:36.600

Town of Parish 1: People may not have care you know they had a big hit on it was a billable they merge it with the other property or they didn't get a letter from the code enforcement officer.

488

01:16:36.690 --> 01:16:45.480

Town of Parish 1: So is there may be confusion about that, but when when a district gives form if allies not buildable, it does not get charged a Happy Meal

489

01:16:45.780 --> 01:16:54.780

Town of Parish 1: And so that there's a process to partners go through to eat emerge, the property. If it's like an adjacent Parsons, they had a house on making out of

490

01:16:54.990 --> 01:17:05.610

Town of Parish 1: A big emotional next year, but it's too small and neat. The building on harness that can be merged or there could be a letter from the code enforcement officer that would say a non billable the line I would not be assessed to have to do

491

01:17:06.690 --> 01:17:07.620

Town of Parish 1: Something you want to add to

492

01:17:11.400 --> 01:17:12.750
GET THIS STRAIGHT. So if

493
01:17:13.890 --> 01:17:17.550
My house and I don't connect what am I paying

494
01:17:21.120 --> 01:17:34.230
Town of Parish 1: So if you have a single family home on that property as opposed to make it personal. Then you're going to pay you. Now that how that one either you get assessed.

495
01:17:34.950 --> 01:17:47.400
Town of Parish 1: It, whether that just includes the debt or the ocean is a decision that the board is going to have to make, how they when they set up their billing have how they're being assessed that warning you.

496
01:17:47.970 --> 01:18:01.650
Town of Parish 1: And the same situation goes for the happening, you were going to decide how much different costs are fixed are going to get applied that way, but it would it would not include the use of God, not put that on those costs.

497
01:18:07.980 --> 01:18:09.420
It's coming to the tell more

498
01:18:16.980 --> 01:18:19.260
Town of Parish 1: Clarify clarify that.

499
01:18:21.960 --> 01:18:34.830
Town of Parish 1: In order to get the propositions before the bowl voters, you'll have to adapt the resolution or an order which simply recites the history that's gone and approves the increase in the cost

500
01:18:35.160 --> 01:18:41.430
Town of Parish 1: Of the project in the increase in the cost per edu that orders at all that origin to do

501
01:18:41.910 --> 01:18:51.990
Town of Parish 1: It in that order is going to state that it's subject to a mandatory referendum, so it's not effective in the lesson until a majority of the eligible voters voting approval if they do.

502
01:18:52.950 --> 01:19:09.900

Town of Parish 1: After that, if it is approved by the majority of the eligible voters voting an amended resolution will have to come before the board to approve for a bond resolution, the full amount of the project. So you'll actually be voting on that, on that amount twice.

503

01:19:15.420 --> 01:19:32.670

Town of Parish 1: So Joe Just to clarify if the order is approved by the board and then the referendum is held and it gets voted down, then the bond resolution never comes before the board right so the bond resolution for the 16 million done with never talked before the board if it's going down.

504

01:19:34.110 --> 01:19:38.940

Town of Parish 1: Is that your question. Yeah. So basically the boards is voting.

505

01:19:40.410 --> 01:19:48.210

Town of Parish 1: Correct. That is exactly what the order does it says no, then the water. Right, right.

506

01:19:49.290 --> 01:19:49.740

Okay.

507

01:19:54.300 --> 01:20:01.080

Town of Parish 1: The order to vote on to send it to the public. It's going to require a simple majority vote of the board right if the

508

01:20:01.500 --> 01:20:10.620

Town of Parish 1: If that proposition gets approved by the voters and it comes back to you, then the bond resolution will require super majority of at least four. So there's a little difference in the in the voting.

509

01:20:15.390 --> 01:20:17.280

Town of Parish 1: There's a question in the back.

510

01:20:27.990 --> 01:20:30.540

The outcome of that department.

511

01:20:32.370 --> 01:20:32.700

To take

512

01:20:34.260 --> 01:20:37.560

Those up leading overall costs to our catch

513

01:20:39.030 --> 01:20:40.950

All these buildings for later.

514

01:20:42.900 --> 01:20:43.200

On

515

01:20:49.290 --> 01:21:02.910

Town of Parish 1: So the question is, how do we, the cost of hook up the municipal own properties in the village, how would that affect village tax rates because the village would be responsible for paying up

516

01:21:04.230 --> 01:21:07.290

Town of Parish 1: Yep, and how those class affect

517

01:21:07.590 --> 01:21:23.220

Town of Parish 1: The school attaches out of state for the school. So that would be a question that the school board would need to take. They know what their costs would be for water, they would have to look at that day, I think, in fact, you did. You said it was open one up certain percentage

518

01:21:24.630 --> 01:21:25.050

Yeah.

519

01:21:31.710 --> 01:21:31.950

Town of Parish 1: Right.

520

01:21:33.210 --> 01:21:53.430

Town of Parish 1: So that you know the answer for this for the school, the village. I guess we could probably we know how many parcels are that ability we have any questions or town that would be hooked up to get providing those that information, those estimates to the

521

01:21:54.600 --> 01:22:06.450

Town of Parish 1: Town and see what their number he used the pain and what impact made my guess is probably very minimal. But I don't know that for sure. Okay, so

522

01:22:07.680 --> 01:22:07.920

Sure.

523

01:22:09.030 --> 01:22:09.810

Sure.

524

01:22:10.860 --> 01:22:13.530

Because you have other tasks so

525

01:22:19.800 --> 01:22:37.320

Town of Parish 1: So it would be. It's a utility costs job, it would go through the whole school tax base that would go out whatever those charges are to be paid for utilities that would get distributed out across the school tax districts, the school district, not just a portion of the desert.

526

01:22:39.180 --> 01:22:51.090

Town of Parish 1: Everybody in the school district press display your elected other your electric bills or any other expenses that the school would incur would be allocated out over the district, not just a personal decision.

527

01:22:55.740 --> 01:23:06.210

Town of Parish 1: Is nine portion townships that baby daddy. So if it's sunny 5000 year that suddenly Catholicism is divided up or bottom line townships now just

528

01:23:17.010 --> 01:23:18.900

Town of Parish 1: Another couple more questions.

529

01:23:23.490 --> 01:23:24.120

Town of Parish 1: How much

530

01:23:25.410 --> 01:23:35.970

Town of Parish 1: additional cost pursuing this vote if the grants do not come through and we must expect a grant funding from both the state and federal government will be diminished.

531

01:23:37.500 --> 01:23:42.390

Town of Parish 1: And we cannot pursue the project how much additional debt or have well we have accumulated

532

01:23:43.620 --> 01:23:53.910

Town of Parish 1: We do have a cost summary and I haven't done my laptop. There's already given me any questions, I can pull that up and provide what those costs are the the

533

01:23:55.980 --> 01:24:01.080

Town of Parish 1: Board has a career to date from the very beginning of the project and I can provide that information.

534

01:24:06.780 --> 01:24:16.350

Town of Parish 1: Okay, so then there's a comment about the school taxes will likely go up as well as \$35,000 over 38 years. I'm not sure that I'm not sure what that is getting at.

535

01:24:18.330 --> 01:24:27.510

Town of Parish 1: Why estimated \$900 only for the first year, what determines the cost of futures. So I think we we explain that.

536

01:24:28.200 --> 01:24:40.410

Town of Parish 1: In Gary jumped in on that one, too. So it's the deck was the average cost and the operation maintenance process to Auckland. There's an agreement there would be an agreement between

537

01:24:40.770 --> 01:24:51.150

Town of Parish 1: The town and aqua of the details out how it was costs are paid out would be similar to the agreements to offer has all of the other municipalities that they sell water to

538

01:24:51.960 --> 01:25:02.370

Town of Parish 1: It again in depth to be constant. But the operation maintenance costs could increase in would increase percentage per year. Here the

539

01:25:04.170 --> 01:25:05.070

Formation.

540

01:25:09.390 --> 01:25:26.310

Town of Parish 1: Okay, so just for clarification for folks online if you didn't hear that. Joe Russell just clarify that the statute requires that we specify the first year user content that is why the that is what we're highlighting here today, what would be in the order

541

01:25:30.540 --> 01:25:31.680

Town of Parish 1: I'm sorry, what's that done.

542

01:25:49.980 --> 01:25:56.580

Town of Parish 1: Done reading the comments I can ask if anybody is calling in on a holiday do and then fall. Maybe if there's a way

543

01:25:58.410 --> 01:25:58.890

Town of Parish 1: To see a

544

01:26:00.240 --> 01:26:07.980

Town of Parish 1: Question Well I'll put it this way. There are people who phoned in and I could unmute them, but it could also be a repeat of what we had earlier so

545

01:26:08.730 --> 01:26:21.900

Town of Parish 1: You will be taking that chance if we unmute people that have just phoned in, in some cases, that just says iPhone or something nondescript like that. I have no idea who they are and I can't take responsibility for what we might hear as a result.

546

01:26:25.980 --> 01:26:28.170

Town of Parish 1: We'll see what the borders.

547

01:26:32.610 --> 01:26:36.810

Town of Parish 1: We asked in that level that have been handed out may say that if you get

548

01:26:37.890 --> 01:26:43.980

Town of Parish 1: To choose to let us know ahead of time so you can tell when you die on the phone or whatever.

549

01:26:46.080 --> 01:26:48.720

Town of Parish 1: That you were going to ask the question, so keep within Analytics.

550

01:26:50.610 --> 01:26:53.220

Town of Parish 1: So that is the process that we had asked people to follow.

551

01:26:55.350 --> 01:26:56.610

Town of Parish 1: The other ones are in the chat.

552

01:26:58.350 --> 01:27:04.050

Town of Parish 1: And to clarify Marianne, you've received no such requests at this point from anyone saying they're reporting in

553

01:27:07.080 --> 01:27:08.520

Town of Parish 1: One. Yes, yes.

554

01:27:10.170 --> 01:27:10.800

Kelly. Did you

555

01:27:13.890 --> 01:27:19.650

Town of Parish 1: Send that would be by Diane's Patsy Anya, and we can allow her and she's a she's a known person.

556

01:27:25.380 --> 01:27:27.990

Town of Parish 1: But the next question. If the schools cost.

557

01:27:29.430 --> 01:27:47.760

Town of Parish 1: That cost. Once we get past the taxpayer cuts services are made some not just people or in water district Warner effective said, why should they not get a vote on. Just to clarify the school district does get involved because they are on the district correct job.

558

01:27:51.930 --> 01:28:04.620

Town of Parish 1: The next question is how much does a pw second maintain of our water system would it surely can increase or \$75,000 for a modest increase because they stopped treating the water

559

01:28:05.820 --> 01:28:09.660

Town of Parish 1: So that the bed right into the record and

560

01:28:12.240 --> 01:28:27.720

Town of Parish 1: Then the next question is absentee ballots for not just helpful do department. They help, they help out for people who can't attend last year. So it was held on schools opening house. So just to clarify the town would be boring absentee ballot.

561

01:28:31.620 --> 01:28:49.980

Town of Parish 1: sitcom comment here charges \$125 for up to 25,000 gallons. We're billing period for flat rate users districts like central square or turns to 65 CENTS PER 1000 accounts that is for usage nine infrastructure. So I can't speak to that, but I can confirm that the cost

562

01:28:53.070 --> 01:28:58.320

Town of Parish 1: Spreadsheet were confirmed by engineers. There are some systems.

563

01:29:08.280 --> 01:29:23.190

Town of Parish 1: Great. So just for clarification, Mike was just explaining that there there may be different users and different user categories that are having different rates for aqua but the phrase that we have or what Paris with became was confirmed by opera.

564

01:29:26.280 --> 01:29:28.230

Town of Parish 1: I just got two more Marissa

565

01:29:29.340 --> 01:29:33.210

Town of Parish 1: The movie. Okay, that's that's broken quality.

566

01:29:35.040 --> 01:29:44.430

Town of Parish 1: Did they just take a look up to the property is included, aka running a white male lion to the hall to any other system I've done, they only run to the curb stops. So to clarify.

567

01:29:44.640 --> 01:29:53.280

Town of Parish 1: The cop capital costs do not include the connection from the current stock to the home. That would be the responsibility of the property owner

568

01:29:53.580 --> 01:30:00.330

Town of Parish 1: And it wouldn't be a cost associated with that. So that is not including the capital costs. It wasn't included previously.

569

01:30:00.720 --> 01:30:11.790

Town of Parish 1: In the prior ago and and the partner engineering record. It was not included in nothing has changed with that. It's still saying situation as that was previously in the in the partner report.

570

01:30:13.650 --> 01:30:14.550

Like

571

01:30:15.660 --> 01:30:20.250

Town of Parish 1: Yeah, can you tell me how it was determine who gets the

572

01:30:21.420 --> 01:30:33.210

Town of Parish 1: Is currently. You could have five people out of D that how she's cycles, find the property owner and I own 10 partials return. I only did one

573

01:30:34.500 --> 01:30:36.180

Town of Parish 1: doesn't make much sense that

574

01:30:37.800 --> 01:30:49.050

Town of Parish 1: We don't have any control over that. That's what the law says. And you're right, if you had five people in a be there are five

votes feel with five partners. We get one vote, but that's that's all state law, we have no control over.

575

01:30:50.340 --> 01:30:50.760

Thank you.

576

01:30:54.450 --> 01:31:14.550

Town of Parish 1: I'm just so in case you didn't hear the question. The question was just clarification about the who gets to bow and and wine and Joker's clarify a five minute statue is not anything town decide or has any subjectivity to, you know, specifying anything different than what initialize

577

01:31:17.220 --> 01:31:30.900

Town of Parish 1: There's another common here. So in addition to paying \$100 a year or school village and taxes are likely to English as well. I think, you know, based on feedback. I would recommend that you take a look at that actually provide some

578

01:31:31.440 --> 01:31:40.350

Town of Parish 1: Details on what the impact would be so the actual information on that. Take a look at the school will take a look at the school.

579

01:31:40.890 --> 01:31:50.250

Town of Parish 1: tackles the basic can be a simple calculation is basically going to be assuming just as an increase in the taxable assessed value for the school district. We can do the math.

580

01:32:00.090 --> 01:32:01.620

Town of Parish 1: Yes. Yeah, we can look at that.

581

01:32:09.690 --> 01:32:17.580

Town of Parish 1: Now, I think what she does in areas. So let's say there were 10 properties that were in the town. We're going to be connected and the cost of

582

01:32:17.760 --> 01:32:37.470

Town of Parish 1: Each one of those 1500 dollars 1500 dollars times \$10,000 worth of costs that would be the capital costs for the town taxpayers, because that would be an expense to connect those town properties from the town property to the right away connection.

583

01:32:40.440 --> 01:32:58.440

Town of Parish 1: Right, so the latter, just like the property owners have to pay their costs to the lateral the town would have to pay the cost for its properties for your town water service so that that would get that cost would be that makes sense that you would have into the into the system.

584

01:33:07.170 --> 01:33:07.710
Town of Parish 1: Well, right.

585

01:33:15.390 --> 01:33:16.110
Town of Parish 1: Yeah.

586

01:33:23.100 --> 01:33:26.970
Town of Parish 1: We'll take a look at it sounds like there's some questions on that we can

587

01:33:28.050 --> 01:33:31.800
Town of Parish 1: Make sure that we understand what the impact would be if there was any

588

01:33:40.230 --> 01:33:41.490
Town of Parish 1: I guess it looks like you're just

589

01:33:44.820 --> 01:33:45.930
Town of Parish 1: Trying to get caught up here.

590

01:33:48.360 --> 01:33:49.140
Um,

591

01:33:52.170 --> 01:33:58.230
Town of Parish 1: Does anyone know what the average cost money to connect from the current you guys have an answer for that. Right.

592

01:33:59.550 --> 01:33:59.850
Yeah.

593

01:34:05.220 --> 01:34:09.750
Town of Parish 1: You might want to look that up to do that. Remember what the average would be

594

01:34:14.190 --> 01:34:16.920
Town of Parish 1: Okay, so yes. The answer is yes. The engineers.

595

01:34:18.030 --> 01:34:21.030

Town of Parish 1: Will come back and make sure that they confirm

596

01:34:22.320 --> 01:34:23.190

Town of Parish 1: That out to everybody.

597

01:34:33.390 --> 01:34:34.650

Town of Parish 1: I was just doing the math.

598

01:34:39.870 --> 01:34:43.770

Town of Parish 1: Explaining what the situation was of whatever that cost was I wasn't saying

599

01:34:47.160 --> 01:34:53.700

Town of Parish 1: No, I was just giving an example to try to illustrate what those costs would be, it would get incorporated into the town.

600

01:34:54.210 --> 01:35:07.950

Town of Parish 1: Village budget. I like I said, we'll go back and look at each parcel and see what parcels would be connected so that we are getting will give you real data so that you have what you need to make a decision.

601

01:35:17.160 --> 01:35:17.640

Town of Parish 1: I think that's

602

01:35:19.500 --> 01:35:23.430

Town of Parish 1: The last question. I think that looks like. Okay.

603

01:35:49.290 --> 01:36:12.300

Town of Parish 1: Hi, my name is Marty Webster, and I'm here from a whole different point of view. I'm a director president, the Federal Housing Development Council, etc. We have a parcel that in 28th wider screen. It was given to us by a firearm owner as a donation. At the time, it is 11 a woman.

604

01:36:13.500 --> 01:36:25.170

Town of Parish 1: We tried and tried to determine how we can fix them. So we end up with a good law. And because of that, we received a letter from supervisors.

605

01:36:26.280 --> 01:36:39.900

Town of Parish 1: And we read it and read it again. I was appointed by the other directors to represent always see as Harry and to make them one goal.

606

01:36:42.780 --> 01:36:49.830

Town of Parish 1: So I read the letter. So very interesting. We look in what was included was a listing trying to

607

01:36:50.940 --> 01:36:51.300

Town of Parish 1: The

608

01:36:53.040 --> 01:36:59.280

Town of Parish 1: EU change from point five for bacon law, which makes sense to zero.

609

01:37:00.450 --> 01:37:04.320

Town of Parish 1: I said, gee, maybe they're recognizing we're tax exempt organization.

610

01:37:05.340 --> 01:37:23.940

Town of Parish 1: No, wait a minute. We're not tax exempt from water district charges. So then I said, well, maybe they think we have a lot more room. So like all code enforcement verified that it's a global law.

611

01:37:25.950 --> 01:37:36.420

Town of Parish 1: Something's not adding up here. I said I want the right to be able to pay. Absolutely. So I decided to look through the whole district.

612

01:37:37.800 --> 01:37:49.740

Town of Parish 1: And I looked primarily go into properties and sure enough village problems there were smaller than the town. Cool.

613

01:37:50.790 --> 01:37:53.400

Town of Parish 1: Were changed from point five zero.

614

01:37:54.720 --> 01:38:03.930

Town of Parish 1: But the village code or 60 feet or 500 repeated down but no laws were eligible to be vulnerable.

615

01:38:05.010 --> 01:38:11.400

Town of Parish 1: And in bed, since September 9 and that was me at least one of them is applied for filming.

616

01:38:12.870 --> 01:38:23.430

Town of Parish 1: So it's not quite so I decided that this presentation, I wouldn't do the whole thing and the sides are a lot. There are 15 others in the village.

617

01:38:25.410 --> 01:38:32.730

Town of Parish 1: Parents that we're changing point five to zero we add those to the water district sad worried

618

01:38:35.070 --> 01:38:38.940

Town of Parish 1: That first year costs below the 900 I can present this

619

01:38:40.530 --> 01:38:51.120

Town of Parish 1: I'd also like to make presentation. The whole idea that the reason for water. This is for someone like going to PC to be able to go on a lot of present

620

01:38:51.990 --> 01:38:57.990

Town of Parish 1: A new home in the village for Paris and this may be true on the other city lots of the village.

621

01:38:58.950 --> 01:39:13.920

Town of Parish 1: Outside of the village, the whole reason for water district is to advance development and of course we go logic built in point five you the one you can work. There was a two family but we stick with taking a family room typically

622

01:39:15.870 --> 01:39:17.010

Town of Parish 1: So the whole idea is

623

01:39:18.030 --> 01:39:25.260

Town of Parish 1: To even have the option of development of this area. There's only one other comment I'd like to make it thank you for the time.

624

01:39:26.850 --> 01:39:39.900

Town of Parish 1: Since the ballistic this water district policy was made these 12 these files in the county clerk's office or properties within this I don't know which ones alone.

625

01:39:40.560 --> 01:39:49.260

Town of Parish 1: Received a letter from supervisor pillars, but we can forget about those that have purchased partners within the district since that community. So

626

01:39:50.400 --> 01:39:52.260

Town of Parish 1: Thank you very much for your time. Thank you.

627

01:40:01.590 --> 01:40:12.330

Town of Parish 1: So I did want to just circle back. I said that I had the cost of data. And so I had a chance to look up that that information. And so, as of October.

628

01:40:12.540 --> 01:40:23.100

Town of Parish 1: The total class today, which include which included at that time the legal fees that had been incurred on there were there were not any birthday.

629

01:40:23.340 --> 01:40:39.780

Town of Parish 1: invoices that have been received yet, but there is a budget of 15,000 available for that. But the total invoices had been received total \$52,803 as of October, early October. And that included

630

01:40:40.650 --> 01:40:57.330

Town of Parish 1: Prior expenses that had been incurred for the former engineering work for the what we're calling the studies right the previous studies and the environmental review that was also done by different engineering

631

01:41:05.910 --> 01:41:11.490

Town of Parish 1: I haven't done. We haven't done those calculations and take the board plan to get through this process.

632

01:41:11.700 --> 01:41:25.500

Town of Parish 1: In this bowl and then you know the vote doesn't go through and then obviously will be figuring that out if there may be some financing options to spread it out. That's something that we had talked about it with the board taking out on it.

633

01:41:26.040 --> 01:41:34.110

Town of Parish 1: Apply all of that one year if they want to take it out so that it gets spread out over a couple years they would have a choice to them.

634

01:41:46.650 --> 01:41:49.560

Town of Parish 1: Process that you go for for this project and

635

01:41:55.800 --> 01:41:58.290

Town of Parish 1: We'll go back and take a look into the US.

636

01:41:59.880 --> 01:42:07.110

Town of Parish 1: And they give me the town requirement for us to the village to I can address that. Sure. I was

637

01:42:10.710 --> 01:42:15.480

Town of Parish 1: An error, I believe we didn't do the village village zoning.

638

01:42:16.530 --> 01:42:18.690

Town of Parish 1: zoning and actually be on

639

01:42:19.800 --> 01:42:27.420

Town of Parish 1: Top as far as she's going to copy that I'm sure glad. And yeah, take a look at that show

640

01:42:29.190 --> 01:42:29.760

Town of Parish 1: So that

641

01:42:35.010 --> 01:42:37.350

Town of Parish 1: Changes your calculation.

642

01:42:38.670 --> 01:42:43.590

Town of Parish 1: Then will revise the order for the Board of your app instead of 17

643

01:42:45.330 --> 01:42:49.170

Town of Parish 1: And as Dawn said if the US is pretty

644

01:42:51.030 --> 01:42:51.390

Unique

645

01:42:53.610 --> 01:42:55.770

Town of Parish 1: So you can revise

646

01:42:57.660 --> 01:42:59.070

Town of Parish 1: Revised okay

647

01:43:00.480 --> 01:43:12.780

Town of Parish 1: So I got a question I guess if that's the case, if this project goes, everything goes and we don't start doing anything to say

here however long that takes us to get things moving and getting in place and people buy crack

648

01:43:13.470 --> 01:43:19.800

Town of Parish 1: That bacon right now and they start building it. Will the US continually change based on classical

649

01:43:20.850 --> 01:43:24.240

Town of Parish 1: Okay, so then it would still go down, it was

650

01:43:25.440 --> 01:43:25.920

Town of Parish 1: Vegan

651

01:43:30.180 --> 01:43:44.670

Town of Parish 1: So going back to the build of a lot. Question. Yes. I mean, he we looked at the billable last with the information that we had at that time knowing that the ability to a little bit different will have to take a look at that and see what that does to the numbers so

652

01:43:45.930 --> 01:43:48.000

Town of Parish 1: And as far as the calculation.

653

01:43:49.350 --> 01:43:54.810

Town of Parish 1: As I explained earlier, we looked at this with a fresh set of eyes based on funding agency guidance so

654

01:43:55.170 --> 01:44:05.670

Town of Parish 1: A single family home is one you are two family home is tweeting us because theoretically, you're going to use twice as much water as a single family house. Same thing with three family houses.

655

01:44:06.060 --> 01:44:15.060

Town of Parish 1: And then commercial properties are all based on what their water usage is it wouldn't get warm records. That's, that's an accurate piece of information. He used to think

656

01:44:15.630 --> 01:44:32.070

Town of Parish 1: How much you might use computers in the house, don't have records. We will get similar properties and other communities. For example, the data we looked at one and another entity to see what they're wanting us with was and assume that it's going to be a biography here.

657

01:44:33.090 --> 01:44:44.400

Town of Parish 1: So that's sort of how we got in the process. It's, it's completely factual. It's not, it's not really our opinion and this is the information. This is how you go about

658

01:44:54.360 --> 01:44:57.540

Town of Parish 1: Looking at this, right, we have to be in close contact with

659

01:44:59.580 --> 01:45:00.060

Town of Parish 1: Selling

660

01:45:02.280 --> 01:45:02.760

Town of Parish 1: Or might

661

01:45:15.960 --> 01:45:17.160

Town of Parish 1: Be even closer

662

01:45:21.810 --> 01:45:23.040

Town of Parish 1: Good to know. First, a Coca

663

01:45:26.130 --> 01:45:32.070

Town of Parish 1: cola and then assessor with doing an adjustment completed, you know,

664

01:45:33.390 --> 01:45:34.650

Town of Parish 1: The different stages on

665

01:45:37.050 --> 01:45:37.380

Town of Parish 1: Page.

666

01:45:38.970 --> 01:45:40.620

Town of Parish 1: Is information to tell them or

667

01:45:42.030 --> 01:45:43.290

Town of Parish 1: To change it to you.

668

01:45:44.730 --> 01:45:45.840

Town of Parish 1: But you got to work together.

669

01:46:10.920 --> 01:46:12.120

Town of Parish 1: We're still waiting for Diane

670

01:46:19.170 --> 01:46:33.450

Town of Parish 1: So the next question. Is it possible to seek additional private grants for residential development areas. After the boat passes and apply those grants for funding to the day to reduce the cost of losers.

671

01:46:36.300 --> 01:46:36.780

Town of Parish 1: Well,

672

01:46:52.440 --> 01:47:09.840

Town of Parish 1: Right. And maybe this goes back to what we said before, I suppose we're asking about that is that we presented what we believe is a reasonable scenario. There could be other opportunities, but we're not pretending best case scenario.

673

01:47:12.300 --> 01:47:12.540

Right.

674

01:47:15.450 --> 01:47:16.080

Town of Parish 1: Yeah.

675

01:47:20.070 --> 01:47:23.400

Town of Parish 1: Sure the line here, the collateral

676

01:47:25.470 --> 01:47:26.730

Town of Parish 1: Is that case for

677

01:47:28.140 --> 01:47:30.090

Town of Parish 1: This may be strapped for money and

678

01:47:33.810 --> 01:47:37.740

Town of Parish 1: You guys have done some projects like this. We had some experience with

679

01:47:38.820 --> 01:47:40.140

Town of Parish 1: My work. I mean, I can talk

680

01:47:43.770 --> 01:47:43.980

Town of Parish 1: Forever.

681

01:47:51.420 --> 01:47:55.230

Town of Parish 1: Yeah. Typically, the homeowner with contractors
contractors

682

01:48:00.120 --> 01:48:16.020

Town of Parish 1: Yeah, I can hear me better typically the homeowner
property under contract directly with a contractor to extend the letter
from the service connection there would be a curve stop near the right
way.

683

01:48:17.730 --> 01:48:36.540

Town of Parish 1: Yeah, just shut off, it's going to shut off the road
road right away. Turn it turn into chips or off. So that would be a
direct contract between the property owner homeowner and the contractor
to do the cell could potentially incur

684

01:48:44.850 --> 01:48:52.320

Town of Parish 1: Me. Correct. Okay, and other home improvement loans for
things like that are well sometimes

685

01:49:00.240 --> 01:49:01.290

Town of Parish 1: Okay, we

686

01:49:02.610 --> 01:49:03.330

Town of Parish 1: Got to find them.

687

01:49:10.500 --> 01:49:11.880

Town of Parish 1: Here or here.

688

01:49:17.190 --> 01:49:18.900

Town of Parish 1: You know, further are looking to

689

01:49:22.380 --> 01:49:27.960

Town of Parish 1: Pass and the people you're going to have to know how

690

01:49:29.760 --> 01:49:29.880

Town of Parish 1: To

691

01:49:31.650 --> 01:49:31.860

Town of Parish 1: My

692

01:49:33.750 --> 01:49:39.120

Town of Parish 1: Brain as it is today. Oh, it's just to the curse of the
water mains.

693

01:49:41.100 --> 01:49:49.080

Town of Parish 1: With the costuming a homeowners or property owners expense from cursor to the residents to business.

694

01:49:51.300 --> 01:49:57.000

Only have like 5500 feet off the ground and we

695

01:49:58.860 --> 01:50:00.780

Town of Parish 1: Do that. Yeah.

696

01:50:01.800 --> 01:50:04.470

Town of Parish 1: We look at a they're not going according to

697

01:50:06.030 --> 01:50:06.480

Those

698

01:50:09.480 --> 01:50:12.780

Town of Parish 1: Check to see if it's probably publisher requirements name.

699

01:50:20.460 --> 01:50:20.760

Town of Parish 1: For

700

01:50:21.840 --> 01:50:27.810

Town of Parish 1: Distance or go see the wrestler actor

701

01:50:31.320 --> 01:50:32.640

Town of Parish 1: Did you hear what he said.

702

01:50:34.980 --> 01:50:37.830

Town of Parish 1: There's a surge of this of this article you have

703

01:50:39.060 --> 01:50:41.970

Town of Parish 1: An actor that its flesh. He doesn't

704

01:50:43.620 --> 01:50:43.890

Town of Parish 1: Know,

705

01:51:01.290 --> 01:51:22.470

Town of Parish 1: Connections here that you might recall contract or yeah definitely seen that happen. There's a discount by volume, we've seen contractors come in and do a whole stretch on the road is still between the homeowners, the contractor, but definitely the more they do. There's typically

706

01:51:25.110 --> 01:51:28.350

Town of Parish 1: It could be the contract, especially during the project.

707

01:51:28.950 --> 01:51:36.690

Town of Parish 1: Doing a lot of our installation. So the contractor that's already there putting me in the ground, maybe getting the horse race.

708

01:51:37.020 --> 01:51:55.980

Town of Parish 1: To do model so well they're bright, they're doing, you know, the main installation but but that even privately with the homeowner for those connections, the house that I know when that district reform that sounds previous owner. They all got together and I recorded the main domain.

709

01:52:05.820 --> 01:52:19.650

Town of Parish 1: So it seems that you're alone other costs that you have to. So I'm very grateful for the explanation in the letter because over the last

710

01:52:20.490 --> 01:52:34.020

Town of Parish 1: 15 years we've never had anything specific. But it also has doubled since the last time you had something that was even an idea of what it was going to cost. So, two years ago, when we go in

711

01:52:34.680 --> 01:52:54.600

Town of Parish 1: It was going to cost has all about. Now the contest don't know, two years later, and we still have a lot more costs that needs to be figured out on top of the school district costs and I'm a village residents like a village task I paid for sewer every year, it seems

712

01:52:55.800 --> 01:53:09.240

Town of Parish 1: I hope today, but when are we going to find this information out a supervisor said it was no less than 60 days no more than 75 days it's going to be Christmas time and

713

01:53:10.350 --> 01:53:15.150

Town of Parish 1: How are we going to find out the information that we all need to know. Sure.

714

01:53:15.660 --> 01:53:31.680

Town of Parish 1: So the question is, there is concerned about the impact of the wire desert costs on village, how will this affect those tax rates, how will this affect contacts or will this impact school tax breaks

715

01:53:32.340 --> 01:53:41.730

Town of Parish 1: And when we know this information. So these calculations are not, are these are easy like we can do the math on this.

716

01:53:42.240 --> 01:53:54.270

Town of Parish 1: Within a couple days. This is not anything complicated to calculate. So if what I can tell you is typically these lateral concept. We're talking about for the town village for going to be like insignificant, I would say, have

717

01:53:54.570 --> 01:54:05.730

Town of Parish 1: minimal to no impact. But I want to do the math on that and make sure they have what those numbers are in the school district will be easy to calculate to we know what the tax basis of published by the county

718

01:54:06.000 --> 01:54:12.900

Town of Parish 1: Will go online and look it up tomorrow will take the cost divided by the tactical assessed value and then after that.

719

01:54:13.230 --> 01:54:21.180

Town of Parish 1: Numbers going to be readily available. So I think, you know, within a week, we can have this information, you can write up to questions from today.

720

01:54:21.480 --> 01:54:31.260

Town of Parish 1: Put it put those questions with the answers that that could be published on on the town website but get you guys to find this is going to come from me. Within a week.

721

01:54:36.180 --> 01:54:47.910

Town of Parish 1: So letter came to my house and I noticed that I'm not always checking out the website. I work and our kids. We have people in our lives. And it seems that past

722

01:54:48.720 --> 01:54:58.830

Town of Parish 1: Meetings and hearings, it seems like you're kind of trying to get swept under the rug and I realized that not even worth it sounds like part of that. But if I miss information.

723

01:54:59.280 --> 01:55:11.340

Town of Parish 1: I'm still the one that has to pay for it in the long run past right seems like a short meditation tonight. Everybody came together everything everybody was talking with one another.

724

01:55:14.010 --> 01:55:15.510

Appreciate what information.

725

01:55:23.040 --> 01:55:23.580

You don't have

726

01:55:25.530 --> 01:55:30.840

A good way this was good information. But everything we shared

727

01:55:40.650 --> 01:55:43.920

Town of Parish 1: Marian, there is a cost associated with doing

728

01:55:47.070 --> 01:55:47.700

That so

729

01:55:51.060 --> 01:55:56.880

Town of Parish 1: Yeah, just like one person to carry that over the postage. I don't have any problem doing that.

730

01:55:58.320 --> 01:56:08.250

Town of Parish 1: Would ever put someone in the budget beginning postage indicating would prefer to getting information from them, but I want you on today. This is why we're doing this.

731

01:56:09.060 --> 01:56:21.510

Town of Parish 1: We're putting it in your purity and you're going to make a decision. If you want the water when I was canvassing in the village. I literally saw one lady whatever she pulled out of the 10 base t

732

01:56:22.560 --> 01:56:28.950

Town of Parish 1: I'm like that you water. Yeah, I can't drink it can't use it to baby can't wash dishes for nothing.

733

01:56:29.640 --> 01:56:41.610

Town of Parish 1: It was all there are people in this town or you're in need of water because the water is good. And there are some of the rest of us that say, well, I have a good well

734

01:56:42.120 --> 01:56:48.540

Town of Parish 1: I don't need a lot because there are others that I probably will be willing to do what I do to help them.

735

01:56:49.140 --> 01:56:58.170

Town of Parish 1: There are people that are trying to sell their homes in this town village and the fact that you're a buyer, the mortgage because of the water.

736

01:56:58.890 --> 01:57:09.930

Town of Parish 1: We need water. And if we delay it and saying, you know, this time it's your choice. Understood. But if you delay it again. And next time you do this, even if its water district 2345, whatever it is.

737

01:57:10.650 --> 01:57:19.410

Town of Parish 1: It's kind of a lot process going to walk along the way along the delay on getting it in the morning, money is going to cost us, and I'm not

738

01:57:20.070 --> 01:57:32.730

Town of Parish 1: DO THAT TO ME TO SAY YES AND JUST NEED YOU TO UNDERSTAND IT ONE O'CLOCK would almost twice the MMA in two years, of course, some of the things that were then or quite

739

01:57:33.390 --> 01:57:44.070

Town of Parish 1: Completed. Interesting. So the dollar amounts that were in that number needed to be added to but we didn't know that. That's it. I need you to understand. That's why I

740

01:57:45.300 --> 01:57:54.750

Town of Parish 1: Asked this word to hire these people the professionals that have been a walk us through this event to do all the things correctly in the correct order and that

741

01:57:55.230 --> 01:58:03.600

Town of Parish 1: Make mistakes so that again when you make the choice, you're going to have the information that we gather together. That's what that

742

01:58:04.800 --> 01:58:05.280

Town of Parish 1: entails.

743

01:58:06.480 --> 01:58:09.180

Town of Parish 1: We'll do our best for the other questions you know the answer to.

744

01:58:10.440 --> 01:58:22.350

Town of Parish 1: The vote is going to be no less than 60 days after the December 17 I thought it was after tonight that the flag for corporate we vote them to do the

745

01:58:24.090 --> 01:58:33.660

Town of Parish 1: Environment, but increase in town, and it would be no less than 60 days after that, you know, more than 75 days after that date, or we would set a date.

746

01:58:34.680 --> 01:58:46.530

Town of Parish 1: For for providing the board is willing to do it, but it's a simple maturity. So it's going to be added five said yes. And then you go back and he's telling me that we would have to have another vote. That would be a super majority vote.

747

01:58:50.100 --> 01:58:54.120

Town of Parish 1: Right. And that wouldn't require a supermajority just four to five.

748

01:58:55.110 --> 01:59:09.270

Town of Parish 1: So again, if you got other questions or need clarification, she found her phone number. I think I put my cell phone number in there. I'll do what I can get you in the region, not always at the office or if you don't, then my style is 315952097

749

01:59:09.540 --> 01:59:17.370

Town of Parish 1: My email is town supervisor Jeannie on the whoops town supervisor at Heritage station without us.

750

01:59:19.140 --> 01:59:24.960

Town of Parish 1: And they know that Tom cook with you to help if you have questions, get them to the right ways to get them.

751

01:59:25.980 --> 01:59:29.880

Town of Parish 1: Not trying to hide anything. We're trying to make sure you're aware, everything

752

01:59:31.260 --> 01:59:31.530

This

753

01:59:38.730 --> 01:59:39.180

Town of Parish 1: Last

754

01:59:40.230 --> 01:59:40.530

Year.

755

01:59:41.640 --> 01:59:42.150

Town of Parish 1: And in here.

756

01:59:45.360 --> 02:00:00.000

Town of Parish 1: Be handed out a resume to us. So we knew who he was. He did everything. Let's find out. He was 80% under folder know he come in here, they didn't give us anything. They are

757

02:00:03.900 --> 02:00:10.740

Town of Parish 1: Into a project completed accomplish face because you have another person. Hello. Well, they get to us. We did our

758

02:00:12.270 --> 02:00:22.020

Town of Parish 1: board. The board is representing the town in the village. So the information requested out of the RFP request for proposal he was all that information.

759

02:00:24.780 --> 02:00:28.710

Town of Parish 1: Understand that he did. But this was up to the board we interviewed

760

02:00:29.730 --> 02:00:34.320

Town of Parish 1: 344 different engineering companies and talk to and

761

02:00:35.430 --> 02:00:37.980

Town of Parish 1: We pick from a US based on interest.

762

02:00:56.220 --> 02:01:01.320

Town of Parish 1: Describe your internet is damn near your door.

763

02:01:02.640 --> 02:01:03.120

Town of Parish 1: Policy.

764

02:01:04.380 --> 02:01:04.650

Sure.

765

02:01:05.730 --> 02:01:07.350

Town of Parish 1: No problem. Thank you.

766

02:01:08.550 --> 02:01:18.030

Town of Parish 1: Just one clarification. I did want to just kind of one thing you mentioned the breakout novel. I didn't want to just clarify the wiring or four

767

02:01:20.070 --> 02:01:27.360

Town of Parish 1: \$7 and 90 cents and they're going to \$909 and some change. So I just wanted to clarify.

768

02:01:28.710 --> 02:01:30.690

Town of Parish 1: You know, etc. But not

769

02:01:31.710 --> 02:01:49.980

Town of Parish 1: Oh, I'm talking about the total cost nine yeah I'm talking about the total cost, the total cost previously for \$707 and 90 cents. That was what was stated in the partner engineering report for you. Yeah, I don't, I don't remember anybody actually

770

02:01:54.180 --> 02:01:56.340

Town of Parish 1: Know, I just wanted to make sure

771

02:01:57.390 --> 02:01:57.960

Town of Parish 1: We're talking I

772

02:02:00.210 --> 02:02:03.330

Town of Parish 1: Wanted to make sure you know, that was the number one.

773

02:02:08.520 --> 02:02:14.700

Town of Parish 1: We were fortunate. The last time that it was cold. Open Enrollment maximum we have public hearings are just easy

774

02:02:15.660 --> 02:02:27.840

Town of Parish 1: It was every product. And that was full of a lot of people I believe a lot of downstream a dedicated hands, but I believe he looked down and I know some of those some of those on that sticks with me.

775

02:02:29.280 --> 02:02:32.640

Town of Parish 1: And then 40 million Kimmy dedicated to anything.

776

02:02:35.430 --> 02:02:38.220

Town of Parish 1: With any other questions. Yes, sir.

777

02:02:39.750 --> 02:02:43.980

Town of Parish 1: Be happy to hire a contractor to come up from the mining

778

02:02:46.920 --> 02:02:47.820

Town of Parish 1: You can do it yourself.

779

02:02:49.380 --> 02:02:51.510

Town of Parish 1: I know other people in other townships that

780

02:02:54.870 --> 02:02:55.890

Town of Parish 1: He had a tractor.

781

02:02:59.100 --> 02:03:00.690

Town of Parish 1: To help out. So yeah, you can do

782

02:03:07.560 --> 02:03:11.010

Town of Parish 1: Any other questions do you have Diane's the waiting. Okay.

783

02:03:13.650 --> 02:03:13.950

Town of Parish 1: Yes.

784

02:03:16.050 --> 02:03:16.290

Okay.

785

02:03:19.980 --> 02:03:20.100

Diane Spaziani: Hi.

786

02:03:20.520 --> 02:03:21.720

Diane Spaziani: I just want to say what you

787

02:03:21.990 --> 02:03:30.690

Diane Spaziani: Want to say one thing to everybody. I want to thank you very much. This is for this meeting tonight and you've done a lot of work. Those of you who are there sitting in the audit in the

788

02:03:31.290 --> 02:03:35.430

Diane Spaziani: Giving the program tonight. It's a lot of work and we thank you for and

789

02:03:35.970 --> 02:03:49.170

Diane Spaziani: Many people in our town need water. They don't have clean, safe water, but people right next door. They have good water and so we need everybody to come together, work together and we're counting on District one to vote for

790

02:03:50.040 --> 02:04:11.070

Diane Spaziani: Water. So the rest of us can have water advanced our town. If you haven't noticed in my opinion. I think our town is on life support if it's even on that and water can bring it alive. So we're depending on all of you, no matter what position you're in to please vote yes for water.

791

02:04:12.660 --> 02:04:13.050

Thank you.

792

02:04:22.800 --> 02:04:23.220

So,

793

02:04:24.240 --> 02:04:24.480

Much

794

02:04:32.010 --> 02:04:33.270

Does that eventually

795

02:04:35.070 --> 02:04:35.760

Diane Spaziani: It more one

796

02:04:38.220 --> 02:04:41.310

Town of Parish 1: At one point, or the first one and then maybe they're more

797

02:04:42.780 --> 02:04:49.020

Town of Parish 1: More mean that the hospital for certain pain beginning

798

02:04:53.430 --> 02:05:01.710

Town of Parish 1: Okay, I'll let you answer the question, is the piece that is brought to me I couldn't answer it goes says water district number, number one is going to have to put in the palm.

799

02:05:02.070 --> 02:05:12.330

Town of Parish 1: Okay, from these things towards going and the tower. If you get more distributors retailers, can the cost of those. These are the other districts and I don't know.

800

02:05:14.880 --> 02:05:17.250

Town of Parish 1: The answer is it depends.

801

02:05:18.930 --> 02:05:33.360

Town of Parish 1: And the reason why is because it depends on when that happens you know if he does it have to save 10 years down the road, then what the way the process works is

802

02:05:34.020 --> 02:05:36.210

Town of Parish 1: You might look at the depth and

803

02:05:37.140 --> 02:05:39.630

Town of Parish 1: The people water that one had paid okay so

804

02:05:39.960 --> 02:05:54.030

Town of Parish 1: This is a decision before it actually ends up taking when they allow other districts that come in if we're going to be using the infrastructure that one district paid for. So let's say as Marianne, say if you guys could entertain.

805

02:05:54.330 --> 02:06:00.690

Town of Parish 1: You could it pops up to this infrastructure and then somebody else on to your instructor say 10 years now, bro.

806

02:06:01.380 --> 02:06:08.340

Town of Parish 1: What you could do. And again, the decision that gets made, is you can say there's a connection to be

807

02:06:09.150 --> 02:06:14.070

Town of Parish 1: And that connection to get upset by the town or based on

808

02:06:14.460 --> 02:06:26.910

Town of Parish 1: The sort of assessment of what the value was for those that get that heterogeneity down by the users in the district and that way. Depends. Like how many years out of his

809

02:06:27.150 --> 02:06:37.440

Town of Parish 1: At what the action and the calling that connection fee. So we've seen it, and lots of projects where this happens. And there's a connector to look at for connectivity for district.

810

02:06:37.860 --> 02:06:47.370

Town of Parish 1: And it might be, you know, \$500,000 a million bucks or whatever that that district rolls those costs and new district goals, those classes that they are project.

811

02:06:47.910 --> 02:06:57.060

Town of Parish 1: And they pay back the district 30 connecting into for the benefit of the dead has already been paid out by those users so

812

02:06:58.020 --> 02:07:12.030

Town of Parish 1: So yes, that can happen, but it's a it's a very nice by case basis, depending on the situation for that project infrastructure music, how much time has gone by and so on the one after that.

813

02:07:13.980 --> 02:07:31.980

Town of Parish 1: We see two interfaces. Does that mean. So it was just another as well on garish would take one or two, three never happens. Are we in water district one. We're just painting forever. And again, it is a usage of the water and is it

814

02:07:47.070 --> 02:07:47.790

Town of Parish 1: We do.

815

02:07:49.980 --> 02:08:01.170

Town of Parish 1: Financial Planning for teenage liberating asset management plan and looking at how much they should be putting in reserves to properly cover their expenses for assets, when they were out in Africa, replace

816

02:08:01.620 --> 02:08:09.120

Town of Parish 1: We are using 38 years because that's the time about us. Daniel development wrong if you get along for

817

02:08:10.050 --> 02:08:16.320

Town of Parish 1: Pro developments 30 years. So that's what we're talking about. What I will tell you is the radio number down

818

02:08:17.070 --> 02:08:31.230

Town of Parish 1: Because by the time that day gets paid off a lot of that infrastructure, some of them in concert is going to have to get replaced again. Or if you're being responsible. It's just like the refinery packs. Right. You might have paid

819

02:08:31.440 --> 02:08:41.460

Town of Parish 1: Your mortgage, but by the time the market is paid out numerous you need to do. You will apply to do whatever new site anyway. And if you're not putting any money away.

820

02:08:41.850 --> 02:08:56.280

Town of Parish 1: Then you're gonna get in trouble. And so some communities do that but they don't maintain a rage. They don't keep up with the cost increases over time or dedicated and I started putting money away and then they call me.

821

02:08:56.910 --> 02:09:05.130

Town of Parish 1: Five years 10 years later, they go, Hey, what are they were indeed and we help. What are we going to do and I gave my angels and

822

02:09:05.670 --> 02:09:15.360

Town of Parish 1: I see this is what's happening. And then those communities, raise your hands on the proceeds rate increases because they have done nothing with us for Rachel, they're getting. So that's why I say

823

02:09:16.080 --> 02:09:26.790

Town of Parish 1: That you should not know if someone knows your rates are going to go down, then that's not the whole picture because that doesn't happen. By the time

824

02:09:28.050 --> 02:09:32.970

Town of Parish 1: Things your debts paid off. There will be other expenses for the increased such that

825

02:09:34.140 --> 02:09:42.180

Town of Parish 1: I'm a part of that. Again, it's not what you want is you don't want to be two genders. If you wanted to just be kind of like your other utilities. If you want to

826

02:09:42.570 --> 02:09:55.740

Town of Parish 1: Drag just keeping up with inflation and if the community is responsible for managing the infrastructure that's the way

that it should be. But somebody says, Oh yeah, the rates are going to drop and pass it off. That's not happen.

827

02:10:03.060 --> 02:10:03.540

Here.

828

02:10:04.890 --> 02:10:05.700

Town of Parish 1: Yeah.

829

02:10:13.530 --> 02:10:21.720

Town of Parish 1: There are other I think the run up to the water. And the other thing is like 99 districts, Jen.

830

02:10:23.970 --> 02:10:34.410

Town of Parish 1: Said, Okay, then what you said. Whatever. There are other people, me included that live in other districts that don't are not included in that I want.

831

02:10:34.950 --> 02:10:45.120

Town of Parish 1: I need this. Some of these guys that was I was working at my welcome to the right people next to it and others did. So it's needed elsewhere. Besides, one

832

02:10:45.510 --> 02:10:54.210

Town of Parish 1: Number one, this is our. This is our first. This is what we got to get done and hopefully getting and then we'll, we'll get water or whatever to whatever

833

02:10:55.350 --> 02:10:55.950

Town of Parish 1: Would you have

834

02:10:57.960 --> 02:11:03.180

Town of Parish 1: Any other questions, anything. Nobody else on chat everybody's done

835

02:11:14.130 --> 02:11:24.120

Town of Parish 1: Last comments just talking about growing the parish further I on discussions are deciding, again, you know, with the development that

836

02:11:24.600 --> 02:11:41.700

Town of Parish 1: Way, there's no guarantee like so not be presented a scenario that said, Oh, well then assume that you're going to have 10%

growth in Paris for the year, you know, these numbers really definitely add those words would go down, but we don't want to present something

837

02:11:45.540 --> 02:11:46.320

Town of Parish 1: Where you're going to be

838

02:11:57.750 --> 02:11:58.470

Town of Parish 1: Because it's cold.

839

02:12:00.720 --> 02:12:03.120

Town of Parish 1: Any other questions regarding this and again

840

02:12:09.330 --> 02:12:10.590

Town of Parish 1: Thank you. Thank you.

841

02:12:12.180 --> 02:12:16.560

Town of Parish 1: Yeah, maybe we'll start another one next year. Those things go

842

02:12:17.640 --> 02:12:35.400

Town of Parish 1: So appreciate everybody coming and asking the question, including a chat here again, if you have other questions that you'd like to address to answer the questions to me or the town. I think our emails and letters. Right. Yeah. So if you can get your source of inspiration.

843

02:12:36.720 --> 02:12:37.770

Town of Parish 1: To whoever

844

02:12:42.000 --> 02:12:44.970

Town of Parish 1: And then we'll go from there. Thank you all for coming.

845

02:13:40.230 --> 02:13:42.420

Town of Parish 1: Yeah, I didn't, I didn't mute him. So

846

02:13:44.580 --> 02:13:47.280

Town of Parish 1: Gary Gary's here. I didn't meet him. He's, he's online.

847

02:13:57.030 --> 02:13:58.140

Town of Parish 1: Speaking at that volume.

848

02:14:04.200 --> 02:14:05.100

Town of Parish 1: Can hear you that way.

849

02:14:13.530 --> 02:14:16.050

Town of Parish 1: Looking to consider in your mailbox.

850

02:14:17.310 --> 02:14:17.760

Town of Parish 1: Cover

851

02:14:20.190 --> 02:14:30.300

Town of Parish 1: We get down to 6635 so we'll do that at the meeting in December and we will also at that point. If you do

852

02:14:31.410 --> 02:14:40.350

Town of Parish 1: Today correct once once a boy says yes to this, then we'll set a date for when we're meeting for the global me and we'll go from there. So,

853

02:14:41.460 --> 02:14:43.650

Gary Wood: I don't have anything else, anything else.

854

02:15:01.980 --> 02:15:04.440

Town of Parish 1: Antonio and I have a good night.
