

Veterans Banner Pricing

As a follow up to our conversation , listed please find pricing options for the banners. As you can see we offer 2 options for banner material

For **digital images**- you have 2 options -18 oz block out vinyl and the best would be custom coated main street fabric. For adverse heat and windy areas, the suggested material would be **coated main street fabric**, since it is the strongest and most long-lasting fabric for Digital banners. This material has been tested from the coast of Alaska, Portland ME, to the Gulf of Mexico. It has held up without fail. We can gladly provide reference on this material as well.

Custom coated mainstreet fabric-Best

- The material is warranted for **3 full years**.
- They won't shadow.
- They are made in the USA
- The process on how we produce them:
- We take 2 pieces of 11 oz. polycotton material(acrylic coated)
- Print on one side of each of them
- We then insert a 10 oz. tear resistant blackout material between them.
- We then sew them all together to make a 32oz. material.
- We then clear coat it with a special" frog juice" which prevent scratching of the inks and makes them fade resistant for at least 3 years.
- We have tested this material for over 6 years with no issues with fading or tearing, especially in the Northeast conditions.
- There isn't a tougher banner material made for printing of full color banners.
- Made in the USA

Pricing
